1 ~~provisions of this section are declared to be severable.~~

2 SECTION 2. Sections 11-9-13.3, 11-9-13.4, 11-9-13.5, 11-9-13.6, 11-9-13.7, 11-9-13.8,
3 11-9-13.11, and 11-9-13.13 of the General Laws in Chapter 11-9 entitled "Children" are hereby
4 amended to read as follows:

5 **11-9-13.3. Legislative intent -- Purpose.** – (1) The use of tobacco and nicotine products
6 by Rhode Island children and youth ~~is a health and substance abuse problem of the utmost~~
7 ~~severity. The legislature finds that tobacco product usage by children in Rhode Island is rampant~~
8 ~~and increasing with over thirty percent (30%) of high school students smoking. The present law~~
9 ~~prohibiting the sale of tobacco to children is being ignored by many retailers. Rhode Island~~
10 ~~tobacco retailers illegally sell four million eight hundred thousand (4,800,000) packs, over eleven~~
11 ~~million dollars (\$11,000,000) in tobacco product sales, to children annually. Tobacco industry~~
12 ~~advertising targets children as the replacement smokers for the one thousand one hundred forty-~~
13 ~~five (1,145) adults who die daily from tobacco product usage. Approximately seventy percent~~
14 ~~(70%) of the Rhode Island high school seniors who are smoking today will be the addicted adult~~
15 ~~smokers of tomorrow. According to the federal Centers for Disease Control and Prevention~~
16 ~~(CDC), smoking related direct medical costs in Rhode Island in 1990 climbed to one hundred~~
17 ~~eighty six million dollars (\$186,000,000). This is an ongoing, escalating financial burden borne~~
18 ~~by every business, large and small, and every person, smoker and nonsmoker, in Rhode Island.~~
19 ~~This is a health and economic drain created by each new generation of children who begin using~~
20 ~~tobacco products and become addicted to nicotine. It is the intent of this legislation to preserve~~
21 ~~and protect the health of children by: (1) stopping the illegal sale of tobacco to children, and (2)~~
22 ~~by severely punishing those who disregard the laws relating to the illegal sale of tobacco products~~
23 ~~to children.~~ is a serious health and addiction problem. Cigarette use has greatly declined among
24 Rhode Island youth, to eight percent (8%), but as the National Youth Tobacco Survey reports, in
25 2014, the overall use of tobacco among youth rose, exposing dangerous new trends. Clever
26 marketing by the tobacco industry, encouraging the use of small cigars, hookahs, e-cigarettes, and
27 flavored vaping products, has put millions of young people at risk of lifelong lethal nicotine
28 addiction. Every year, five hundred (500) children under the age of eighteen (18) in Rhode Island
29 become daily smokers. There are sixteen thousand (16,000) children in Rhode Island today who
30 will ultimately die prematurely from smoking. Current e-cigarette use among middle and high
31 school students has tripled from 2013 to 2014, according to data published by the Centers for
32 Disease Control and Prevention (CDC) and the U.S. Food and Drug Administration's Center for
33 Tobacco Products. The 2014 National Youth Tobacco Survey shows that current e-cigarette use
34 (at least 1 day of use in the past thirty (30) days) among high school students has increased from

1 four and one half percent (4.5%) in 2013 to thirteen and four tenths percent (13.4%) in 2014. This
2 is the first time since the survey started collecting data on e-cigarettes in 2011 that current e-
3 cigarette use has surpassed use of every other tobacco product, including conventional cigarettes.
4 Rhode Island's annual health care costs due to smoking are \$639,604,224.

5 (2) Data shows that ninety to ninety-five percent (90-95%) of adult smokers became daily
6 users before they turned age twenty-one (21). In March of 2015, the Institute of Medicine, on
7 behalf of the Food and Drug Administration (FDA), released a seminal report detailing the
8 potential public health benefits of raising the national legal age of tobacco purchase from age
9 eighteen (18) to age twenty-one (21). In July 2015, the CDC reported that seventy-five percent
10 (75%) of adults favored raising the smoking age to twenty-one (21) years. Among the astounding
11 results was a twenty-five percent (25%) drop in youth smoking initiation, a twelve percent (12%)
12 drop in overall smoking rates, and sixteen thousand (16,000) cases of preterm birth and low birth
13 weight averted in the first five (5) years of the policy, an impact that would be recognized
14 immediately. A conservative estimate is that if age twenty-one (21) were adopted throughout the
15 United States now, it would prevent four million two hundred thousand (4,200,000) years of lives
16 lost to smoking for those born in the years 2000-2019.
