14 applying the share ratio to the district per pupil cost. The local share of the per pupil amount for  
15 each student attending the charter public school shall be paid to the charter public school by the  
16 district of residence of the student and shall be the per pupil cost for the district of residence of

17 enrolled, and each district will report current total district operating expenses and total district  
18 enrollments (including district students enrolled in charter public schools) annually by October 1.  
19 If the October 1 data on a charter public school's student enrollment show a ten percent (10%) or  
20 greater increase or decrease in students from the June membership count, the third and fourth  
21 quarter payments to the charter public school will be adjusted to reflect actual student enrollment
