9 **11-9-13.3. Legislative intent -- Purpose.**

10 (a) The use of tobacco products and electronic nicotine-delivery systems by Rhode Island  
11 children and youth is a ~~health and substance abuse problem of the utmost severity. The legislature~~  
12 ~~finds that tobacco product usage by children in Rhode Island is rampant and increasing with over~~  
13 ~~thirty percent (30%) of high school students smoking. The present law prohibiting the sale of~~  
14 ~~tobacco to children is being ignored by many retailers. Rhode Island tobacco retailers illegally~~  
15 ~~sell four million eight hundred thousand (4,800,000) packs, over eleven million dollars~~  
16 ~~(\$11,000,000) in tobacco product sales, to children annually. Tobacco industry advertising targets~~  
17 ~~children as the replacement smokers for the one thousand one hundred forty five (1,145) adults~~  
18 ~~who die daily from tobacco product usage. Approximately seventy percent (70%) of the Rhode~~  
19 ~~Island high school seniors who are smoking today will be the addicted adult smokers of~~  
20 ~~tomorrow. According to the federal Centers for Disease Control and Prevention (CDC), smoking-~~  
21 ~~related direct medical costs in Rhode Island in 1990 climbed to one hundred eighty six million~~  
22 ~~dollars (\$186,000,000). This is an ongoing, escalating financial burden borne by every business,~~  
23 ~~large and small, and every person, smoker and nonsmoker, in Rhode Island. This is a health and~~  
24 ~~economic drain created by each new generation of children who begin using tobacco products and~~  
25 ~~become addicted to nicotine. It is the intent of this legislation to preserve and protect the health of~~  
26 ~~children by: (1) stopping the illegal sale of tobacco to children, and (2) by severely punishing~~  
27 ~~those who disregard the laws relating to the illegal sale of tobacco products to children. serious~~  
28 ~~health and addiction problem. Cigarette use has greatly declined among Rhode Island youth, to~~  
29 ~~six and one-tenths percent (6.1%) yet even at this low rate, every year, three hundred (300)~~  
30 ~~children under the age eighteen (18) in Rhode Island become daily smokers. There are sixteen~~  
31 ~~thousand (16,000) children in Rhode Island today who will ultimately die prematurely from~~  
32 ~~smoking. Rhode Island's annual health care costs due to smoking are six hundred forty million~~  
33 ~~dollars (\$640,000). As the national youth tobacco survey reports, in 2018, there was a dramatic~~  
34 ~~increase in electronic cigarette use among youth. According to the findings, the number of United~~

1 States high school students who reported being current e-cigarette users increased seventy-eight  
2 percent (78%) between 2017 and 2018 to three million fifty thousand (3,050,000) or twenty and  
3 eight-tenths percent (20.8%), putting millions of young people at risk of lifelong nicotine  
4 addiction. In Rhode Island, twenty and one-tenths percent (20.1%) of high school students use e-  
5 cigarettes.

6 (b) Data shows that about ninety-five percent (95%) of adult smokers began smoking  
7 before they turned age twenty-one (21). In March of 2015, the National Academy of Medicine  
8 (then the Institute of Medicine), on behalf of the Food and Drug Administration (FDA), released  
9 a seminal report detailing the potential public health benefits of raising the national legal age of  
10 tobacco sale from age eighteen (18) to age twenty-one (21). Among the findings was a twenty-  
11 five percent (25%) drop in the rate of smoking initiation by fifteen (15) to seventeen (17) year  
12 olds, a twelve percent (12%) drop in overall smoking rates over time, and sixteen thousand  
13 (16,000) cases of preterm birth and low birth weight averted in the first five (5) years of the  
14 policy, an impact that would be recognized immediately. A conservative estimate is that if age  
15 twenty-one (21) were adopted throughout the United States now, it would prevent four million  
16 two hundred thousand (4,200,000) years of lives lost to smoking for those born in the years 2000-  
17 2019. In July, 2015 the CDC reported that seventy-five percent (75%) of adults favored raising  
18 the tobacco sale age to twenty-one (21) years.
