AN ACT

RELATING TO PUBLIC UTILITIES AND CARRIERS -- COMMUNITY ANTENNA TELEVISION SYSTEMS AND INTERNET SERVICE PROVIDERS

Introduced By: Representatives Solomon, and Kazarian

Date Introduced: January 26, 2022

Referred To: House Innovation, Internet, & Technology

It is enacted by the General Assembly as follows:

SECTION 1. The title of Chapter 39-19 of the General Laws entitled “Community Antenna Television Systems” is hereby amended to read as follows:

CHAPTER 39-19

COMMUNITY ANTENNA TELEVISION SYSTEMS AND INTERNET SERVICE PROVIDERS

SECTION 2. Chapter 39-19 of the General Laws entitled “Community Antenna Television Systems and Internet Service Providers” is hereby amended by adding thereto the following sections:

As used in this chapter:

(1) “Broadband Internet access service” means a mass-market retail service by wire or radio that provides the capability to transmit data to and receive data from all or substantially all Internet endpoints, including any capabilities that are incidental to and enable the operation of the communications service, but excluding dial-up Internet service. This term also encompasses any service that the FCC finds to be providing a functional equivalent of broadband internet access service, or any service or product that is used to evade the protections set forth in this chapter.
(2) “Edge provider” means any individual or entity that provides any content, application or service over the Internet, and any individual or entity that provides a device used for accessing any content application or service over the Internet.

(3) “Future contracts” means contracts awarded or renewed by any state agency on or after July 1, 2022.

(4) “Paid prioritization” means the management of a broadband Internet access service provider's network to directly or indirectly favor some traffic over other traffic, including through use of techniques such as traffic shaping, prioritization, resource reservation, or other forms of preferential traffic management, either:

(i) In exchange for consideration (monetary or otherwise) from a third party; or

(ii) To benefit an affiliated entity.

(iii) Paid prioritization does not include the provision of tiered Internet access service or offerings to a retail end user.

(5) “State agency” means any department in the executive branch of state government and any agency, authority, board, bureau, commission, division, institution, office, or other instrumentality within or created by any such department, and any independent state authority, commission, instrumentality, or agency over which the governor exercises executive authority.

39-19-10.3 Internet service neutrality.

(a) For purposes of this section, adherence to “net neutrality principles” means that a service provider shall not, with respect to any consumer in the state (including the state itself):

(1) Block lawful content, applications, services, or nonharmful devices, subject to reasonable network management that is disclosed to the consumer;

(2) Throttle, impair, or degrade lawful Internet traffic based on Internet content, application, or service, or use of a nonharmful device, subject to reasonable network management that is disclosed to the consumer;

(3) Engage in paid prioritization unless the state waives the ban as to particular purchased or funded Internet access services if the state determines that the practice is in the public interest, promotes public safety, or is otherwise not inconsistent with the purpose of this chapter; or

(4) Unreasonably interfere with or unreasonably disadvantage either:

(i) A customer's ability to select, access, and use broadband Internet access service or the lawful Internet content, applications, services, or devices of their choice; or

(ii) An edge provider's ability to make lawful content, applications, services, or devices available to a customer, subject to reasonable network management that is disclosed to its customers.
(b) No service provider subject to the provisions of this chapter shall engage in any act that violates net neutrality principles.

(c) Any service provider violating of the provisions of this chapter shall be subject to the penalty provisions of chapter 6-13.1 of title 6 as a deceptive trade practice.

39-19.10.4, Internet service neutrality - State purchases.

The division of purchases within the department of administration (DOA), and all other contracting units or officials of any state agency, shall require that all future contracts for fixed or mobile broadband Internet access services be awarded only to service providers that adhere to "net neutrality principles" established in § 39-19-10.3.

(a) As soon as practicable, the division of purchases, with input from the public utilities commission, the division of public utilities and carriers, the emergency management administration (EMA), and the division of information technology, shall amend the state's procurement rules and regulations as necessary and appropriate to comply with this directive, and issue such policies and other guidance, and take such other steps as are determined to be necessary and appropriate, to ensure that §§ 39-19-10.3 and 39-19-10.4 are appropriately implemented and enforced.

(b) Waivers to these procedures may be granted by the director of the department of administration only upon receipt of a written justification from a state agency and a finding by the director that a waiver would serve a legitimate and significant interest of the state. The public utilities commission shall resolve any dispute over the definition of terminology used in this chapter.

(c) Each state agency that procures Internet, data and telecommunications services shall cooperate with the division of purchases and the public utilities commission in implementing this chapter.

(d) The public utilities commission, in consultation with the division of information technology, shall evaluate and advise the governor on potential actions to promote net neutrality to protect Rhode Islanders' access to a free and open Internet.

(e) Nothing in this chapter shall:

(1) Supersede any obligation or authorization a provider of fixed or mobile broadband Internet access service may have to address the needs of emergency communications or law enforcement, public safety, or national security authorities, consistent with or as permitted by applicable law, or limit the provider's ability to do so;

(2) Prohibit reasonable efforts by a provider of broadband Internet access service to address copyright infringement or other unlawful activity; or
(3) Be construed to supersede any federal, state or local law.

SECTION 3. This act shall take effect upon passage.
EXPLANATION
BY THE LEGISLATIVE COUNCIL
OF
A N   A C T
RELATING TO PUBLIC UTILITIES AND CARRIERS -- COMMUNITY ANTENNA TELEVISION SYSTEMS AND INTERNET SERVICE PROVIDERS

***
1 This act would require Internet service providers to follow net neutrality requirements when providing Internet service to any consumer in this state or to the state and require anyone seeking a state contract for Internet service to follow principles of net neutrality. Any service provider violating net neutrality requirements would be subject to the penalty provisions for deceptive trade practices listed in chapter 6-13.1 of title 6.
2 This act would take effect upon passage.
