SECTION 5. Title 42 of the General Laws entitled "STATE AFFAIRS AND GOVERNMENT" is hereby amended by adding thereto the following chapter:

CHAPTER 160.3

THE SOLAR JOBS ACT

42-160.3-1. Short title.

This act shall be known and shall be cited as "The Solar Jobs Act."

42-160.3-2. Legislative findings.

(a) Thousands of low-income Rhode Island residents lose access to electricity each year because they cannot afford to pay their utility bills.

(b) Distributed generation, such as rooftop photovoltaic solar panels, obviates the need to build new, expensive electricity distribution infrastructure, such as transmission lines, substations, and transformers. Once built, the cost of new electricity distribution infrastructure is passed onto rate-payers. Installing distributed generation on some homes, therefore, reduces electricity rates for all utility rate-payers in the state.

(c) Climate change poses a severe threat to every Rhode Island resident. Climate change is drastically accelerated by human activity, particularly activities that emit greenhouse gases.

(d) Installing distributed generation, such as solar panels, on homes will dramatically reduce Rhode Island's greenhouse gas emissions.

(e) Project labor agreements help protect workers by ensuring fair wages, working conditions, and salaries.

(f) Properly designed project labor agreements help the state meet workforce diversity...
goals.

(g) Project labor agreements are necessary for installing solar panels due to the complexity of the work.

(h) Project labor agreements provide the state with a guarantee that public works projects will be completed with highly skilled and safely trained workers.

(i) Project labor agreements provide for peaceful, orderly, and mutually binding procedures for resolving labor issues, preventing significant lost-time on construction projects.

(j) Project labor agreements allow public agencies to predict more accurately the actual cost of the projects.

(k) To address the climate crisis, and to reduce utility bills, Rhode Island must install photovoltaic solar panels on the roofs of tens of thousands of homes in Rhode Island using project labor agreements.

42-160.3-6. Inspection and certification.

(a) The housing jobs department shall send an Inspector to the selected housing unit building of any individual who has submitted a free solar power application, provided that the individual is eligible to submit a free solar power application and their application, in the determination of the director, is reasonably likely to be approved. The inspector shall arrive at the selected housing unit building at a time to which the free solar power applicant has agreed. The
inspector shall inspect the selected housing unit building to assess whether a photovoltaic solar panel system could be safely installed on the selected housing unit building. (b) After completing the inspection of a free solar power applicant's selected housing unit building, the inspector shall issue a safety and feasibility certification of the selected housing unit building if the inspector determines that:

(1) A photovoltaic solar panel system could be safely installed on the applicant's selected housing unit building; and

(2) The photovoltaic solar panel system, once installed on the applicant's selected housing unit building, would not have significantly impaired exposure to sunlight.

(c) A safety and feasibility certification shall include:

(1) The inspector's recommendation as to the most appropriate location for the photovoltaic solar panel system on the selected housing unit building. The inspector shall make every reasonable effort to honor to the applicant's preference as to the location of the photovoltaic solar panel system, as long as the applicant's preferred location would not compromise the safety of the selected housing unit building's occupants or the structural integrity of the selected housing unit Building, and would not significantly impair the solar panel system's exposure to sunlight.

(2) The inspector's recommendation as to the most appropriate type of photovoltaic solar panel system to install on the applicant's selected housing unit building, including with respect to size, shape, manufacturer, nameplate generation capacity, wiring, and any other relevant solar panel features.

(i) When recommending a photovoltaic solar panel system for a single family residence, the inspector shall recommend the installation of the photovoltaic solar panel system with the highest nameplate generation capacity as is feasible without compromising the safety of the housing unit's occupants or the structural integrity of the housing unit and without significantly impairing the photovoltaic solar panel system's exposure to sunlight, except that the inspector shall not
recommend a photovoltaic solar panel system with greater than four thousand watts (4,000 W) of
nameplate generation capacity.

(ii) When recommending a photovoltaic solar panel system for a multifamily residence, the
Inspector shall recommend the installation of the photovoltaic solar panel system with the highest
nameplate generation capacity as is feasible without compromising the safety of the housing unit's
occupants or the structural integrity of the housing unit and without significantly impairing the
photovoltaic solar panel system's exposure to sunlight.

42-160.3-7. Solar installation contract.

(a) After an inspector has issued a safety and feasibility certification and determined the
most appropriate type of solar panel system to install on the applicant's selected housing unit
building, the housing jobs department shall send the applicant a solar installation contract
describing the proposed solar installation. The proposed solar installation shall include a description
of:

(1) The most appropriate location for the photovoltaic solar panel system on the selected
housing unit building, according to the inspector's recommendation provided in the safety and
feasibility certification; and

(2) The type of solar panel system that would be most appropriate to be installed on the
applicant's selected housing unit building, including with respect to size, shape, manufacturer,
nameplate generation capacity, wiring, and any other relevant solar panel features, according to the
inspector's recommendation in the safety and feasibility certification. The document shall also
provide prominently displayed estimates of approximately how much electricity the proposed solar
installation will produce in an average year, as well as an estimate of how much money the applicant
will save on their annual electricity bill if the proposed solar installation were installed.

(b) The bottom of the solar installation contract shall include a space for the applicant's
signature and date of signature, as well as clear and accessible language indicating that the applicant
is, under no circumstances, required to sign the solar installation contract. The solar installation
contract shall also indicate that, if the applicant signs the solar installation contract, they are
consenting to the installation of the proposed solar installation.

(c) The solar installation contract may include any additional provisions that the director
deems appropriate, provided such provisions are consistent with the requirements of this chapter.

(c) After approving a free solar power application, an employee of the housing jobs department shall:

(1) Promptly notify the applicant that their application has been approved; and

(2) Determine a mutually convenient time for both the department and the applicant to install the proposed solar installation on the selected housing unit building.

(d) If an applicant has had their free solar power application approved, the housing jobs department shall pay the full and complete cost of installing a photovoltaic rooftop solar panel system on the applicant’s selected housing unit building.

(a) The housing jobs department shall divide all free solar power applications into two (2) categories:

(1) Free solar power single family residence applications; and

(2) Free solar power multifamily residence applications.

(b) When considering multiple free solar power single family residence applications, the housing jobs department shall, at all times, prioritize a free solar power single family residence application submitted by an individual with a lower cumulative adjusted gross household income over a free solar power single family residence application submitted by an individual with a higher cumulative adjusted gross household income.
(c) When considering multiple free solar power multifamily residence applications, the
housing jobs department shall, at all times, prioritize a free solar power multifamily residence
application for a selected housing unit in a census Tract with a lower median household income, as
calculated by the U.S. Census Bureau, over a free solar power multifamily residence application
for a selected housing unit in a census tract with a higher median household income, as calculated
by the U.S. Census Bureau.

42-160.3-10. Advertising in low-income communities.

The housing jobs department shall make substantial and sustained efforts to advertise the
solar jobs program in low-income communities across Rhode Island, including the availability of
free solar panel installations.

The department shall investigate credible and reasonable requests for routine maintenance, upkeep, and repairs promptly. If, upon investigation, the department determines that a photovoltaic solar panel system is in need of routine maintenance, upkeep, and repairs, the department shall perform the necessary routine maintenance, upkeep, and repairs promptly. The department is released from the obligation to perform routine maintenance, upkeep, and repairs if the recipient of the solar panel installation makes it unreasonably difficult to perform the routine maintenance, upkeep, and repairs, including by refusing to allow agents, contractors, or employees of the department on the premises or by failing to agree to a time during which the routine maintenance, upkeep, and repairs shall take place.

42-160.3-13. Legal ownership of the photovoltaic solar panel systems.

(a) Once a photovoltaic solar panel system is installed on an applicant's housing unit, the photovoltaic solar panel system is the property of the department.

(b) The department shall include in the solar installation contract:

(1) A provision prohibiting the applicant from selling, removing, deliberately damaging, sabotaging, or dismantling the proposed solar installation; and

(2) Any additional restrictions on the ways in which the applicant may use or affect the proposed solar installation that the director deems appropriate.

(c) If legal or equitable ownership of a housing unit building is transferred after a photovoltaic solar panel system is already installed on it, pursuant to the solar jobs program, the transferee automatically assumes all legal rights and duties with respect to the photovoltaic solar panel system that were previously attached to the transferor.

(a) The owner of a multifamily residence building which receives a photovoltaic solar panel system installation, pursuant to the solar jobs program, shall enroll in the community net metering program under chapter 26.4 of title 39. The electric distribution company providing electricity to the multifamily residence building must install a net meter, and may not charge the owner of the multifamily residence building, or any residents of said building, for either the net meter or any installation costs.

(b) If the owner of a multifamily residence building receives a photovoltaic solar panel system installation, pursuant to the solar jobs program, the full financial benefit of the electricity
thereby produced shall be awarded to the tenants of the multifamily residence building in the form of reduced utility bills. The utility company shall offset the utility bills paid by the tenants of the multifamily residence building on an equal basis by housing unit.

(c) The owner of a single family residence which receives a photovoltaic solar panel system installation, pursuant to the solar jobs program, shall enroll in the net metering program under chapter 26.4 of title 39. The electric distribution company providing electricity to the single family residence must install a net meter, and may not charge the owner of the multifamily residence building, or any residents of said residence, for either the net meter or any installation costs.

42-160.3-15. Just transition and diversity.

(a) When hiring employees, hiring contractors, awarding contracts, designing project labor agreements, promulgating rules and regulations, and enforcing rules and regulations, the housing jobs department shall:

(1) Maximize, to the greatest extent feasible, lawful, and appropriate, in the judgment of the director, the number of solar jobs program workers who are enrolled in or who have completed the just transition program administered by the department of labor and training, pursuant to § 42-160.3-15.

(2) Maximize, to the greatest extent feasible, lawful, and appropriate, racial and gender equity within the hiring processes for solar jobs program workers.

(b) Contractors, subcontractors, firms, corporations, partnerships, and all other entities working on solar jobs program projects shall, at all times, make good faith efforts to promote workforce diversity for housing construction program projects, including with regard to race and gender. If the director determines that a contractor, subcontractor, firm, corporation, partnership, or other entity is not making good faith efforts to achieve workforce diversity, the director may prohibit that entity from bidding on contracts or being awarded contracts for solar jobs program projects for two (2) years.

42-160.3-16. Severability.

(a) If any provision of this chapter is held invalid, the remainder of this chapter shall not be affected thereby.

(b) If the application of any provision of this chapter to any person or circumstance is held invalid, the application of such provision to other persons or circumstances shall not be affected thereby.
