## State Aid to Local G overnments

State aid for local governments for FY 2012 is estimated to total $\$ 66.2$ million from state general revenues under current law. Local units will also receive $\$ 11.8$ million in public service corporation property taxes that are collected on their behalf by the state. The graph shows the relative allocation among state aid programs from FY 1990 through FY 2012 current estimates.

Total state aid to local governments would be $\$ 66.2$ million for FY 2012. That includes only state funding; it excludes the $\$ 11.8$ million for the public service corporation property taxes. Until recently, the A ssembly increased local aid funding, with most of the increase occurring since FY 1998 with the addition of new programs and, significant changes to existing ones in response to disproportionately high reliance on property taxes compared to other states.

State aid can be classified into general state aid and restricted use aid. General aid payments made to municipalities can be used for general budget use or as reimbursement for costs incurred. Examples include: general revenue sharing, payments in lieu of taxes, distressed communities relief, and vehicle excise tax phaseout payments. The general purpose of these programs is to relieve pressure on local property taxes by providing revenues from the state's broad based taxes to local governments.

Rhode Island ranks high on state and local taxes, both on a per capita basis and as a percentage of personal income, $13^{\text {th }}$ and $16^{\text {th }}$, respectively on both measures in FY 2008 according to census data.

Rhode Island property taxes comprise 52.5 percent of all local revenues; nationally they comprise only 28.3 percent. The Rhode Island percentage is the fourth highest in the United States, partially due to the fact that Rhode Island local governments are not allowed to levy local option general sales or income-based taxes.

| FY 2008 Data from Bureau of C ensus | R hode Island | United States |  | R ank |
| :---: | :---: | :---: | :---: | :---: |
| All State and L ocal T axes |  |  |  |  |
| Per Capita | \$ 4,607 | \$ | 4,412 | 13 |
| As Percentage of Personal Income | 11.1\% |  | 12.0\% | 16 |
| State and Local Property Taxes |  |  |  |  |
| Per Capita | \$ 1,950 | \$ | 1,313 | 5 |
| As Percentage of Personal Income | 4.7\% |  | 3.6\% | 2 |
| Percentage of Income, Sales and Property Taxes | 51.5\% |  | 39.5\% | 7 |
| State and Local Income T axes |  |  |  |  |
| Per Capita | \$ 1,032 | \$ | 1,010 | 20 |
| As Percentage of Personal Income | 2.5\% |  | 2.8\% | 27 |
| Percentage of Income, Sales and Property Taxes | 27.3\% |  | 30.3\% | 35 |
| State and Local Sales Taxes |  |  |  |  |
| Per Capita | \$ 801 | \$ | 1,009 | 35 |
| As Percentage of Personal Income | 1.9\% |  | 2.7\% | 37 |
| Percentage of Income, Sales and Property Taxes | 21.2\% |  | 22.5\% | 40 |
| L ocal Revenues Sources Only |  |  |  |  |
| Percent from State Government | 30.2\% |  | 33.3\% | 35 |
| Percent from Property Tax | 52.5\% |  | 28.3\% | 4 |

Rhode Island also ranks high in the percentage of state and local revenues generated from property taxes. It has traditionally relied more on local property taxes than most states. FY 2008 data showed that it ranks $13^{\text {th }}$ in total per capita state and local taxes, but $5^{\text {th }}$ in state and local property taxes. The rankings are similar when the state and local property taxes are measured as percentages of personal income. Further, it ranks $7^{\text {th }}$ in the share that property taxes contribute to total sales, income and property taxes.

The high rankings are also partially due to the relatively low percentage of state contributions to local budgets. State aid contributed 30.2 percent of FY 2008 local revenue sources in Rhode Island, the $35^{\text {th }}$ lowest percentage in the United States. Nationally, states contributed an average of 33.3 percent. These rankings are in spite of concerted efforts by the General A ssembly to decrease reliance on the property tax as a source of state and local expenditures beginning in the mid 1990s.

Restricted use aid includes payments made to a municipality for a specific purpose or payments to non-governmental entities providing a public service. These include library aid and police and fire incentive pay plan sharing. The largest source of restricted aid is education aid, which is not included here. Information concerning education aid is contained in Rhode Island Education Aid printed as a separate part of this book.

## Summary of Local Aid Programs

The following section provides a brief description of the state funded local aid programs. It is followed by more comprehensive descriptions of each source that include statutory references, legislative changes and funding histories. The appendices at the end of this report provide historical data by community and by fiscal year.

Payment in Lieu of Taxes (PILOT). This program reimburses cities and towns for property taxes which would have been due on real property owned by nonprofit educational institutions, nonprofit hospitals, or any state-owned hospital, veterans' residential facility or correctional facility, which is exempt from taxation by state law. Reimbursement is based on 27.0 percent of the tax that would have been collected if the property had been taxable, subject to appropriation.

General Revenue Sharing. Beginning in FY 1994, a portion of total state tax revenues from the second prior fiscal year have been earmarked as state aid to cities and towns and distributed based on per capita income and local tax burdens for public purposes. In the FY 1999 budget, the General Assembly began increasing the percentage of revenues dedicated to the General Revenue Sharing program as a mechanism for reimbursing municipalities for lost local revenues from the ten-year phase-out of the inventory tax.

The 2005 Assembly provided that 6.25 percent of the state share of video lottery net terminal income solely attributable to new machines at Lincoln and Newport be dedicated to the program, up to a maximum of $\$ 10.0$ million to non-distressed communities based on the proportion of the general revenue sharing distribution for that year. The 2006 A ssembly converted that dedication to 0.10 percent of all net terminal income up to a maximum of $\$ 10.0$ million to non-distressed communities.

The 2009 A ssembly adopted the Governor's recommendation to subject the program permanently to appropriation. The FY 2012 enacted budget does not include any funding for the program.

Distressed Communities Relief Program. The Distressed Communities Relief program was established in 1990 to provide assistance to the communities with the highest property tax burdens relative to the wealth of the taxpayers. The 2005 Assembly increased eligibility for FY 2006 to any community falling into the lowest 20.0 percent for at least three of four indices is eligible for assistance under the Distressed Communities Relief program.

A ppropriated funds are distributed based on the ratio of an eligible municipality's tax levy to the total tax levy of all eligible municipalities. However, when a new community qualifies, that community receives 50.0 percent of current law requirements the first year it qualifies. The remaining 50.0 percent shall be distributed to the other distressed communities proportionately. When a community falls out of the program, it shall receive a one-time transition payment of 50.0 percent of the prior year requirement exclusive of any reduction for first year qualification.

Motor Vehicle Excise Tax Phase-Out. The 1998 General Assembly enacted legislation to eliminate the property tax on motor vehicles and trailers over a period of seven years. It was modified in subsequent legislative sessions to substantially extend the phase-out period. The exemption is a reduction in the assessed value subject to taxation. Cities and towns are paid by the state for the lost taxes due to the exemptions.

It began with a $\$ 1,500$ exemption for FY 2000 tax bills. Cities and towns are held harmless for the exemptions and were reimbursed on the basis of 100.0 percent collections. They also received adjustments for freezing tax rates at the FY 1998 level through FY 2003. Fire districts may no longer levy motor vehicle excise taxes, and they are fully reimbursed for the lost revenues.

The 2008 A ssembly adopted the Governor's recommendation to maintain the exemption at $\$ 6,000$ for FY 2008 and FY 2009, and to permanently reduce the M otor Vehicle Excise Tax reimbursements to 98.0 percent of the calculated value beginning with $F Y$ 2008.

The Governor included legislation in his FY 2010 revised budget to eliminate the third and the fourth quarter reimbursements to municipalities. For FY 2011 and thereafter, the legislation subjects future exemptions to the annual appropriations act.

The Assembly provided total funding of $\$ 117.2$ million to fund the program at 88.0 percent of the amount that would have been due in FY 2010. For FY 2011 and thereafter, the A ssembly enacted legislation that mandates a $\$ 500$ exemption for which the state will reimburse municipalities an amount subject to appropriation. The legislation further allows municipalities to provide an additional exemption; however, that additional exemption will not be subject to reimbursement.

Property Revaluation Reimbursement. The Rhode Island General Laws require that municipalities update property valuations using statistical techniques every third and sixth year following a full revaluation. For the first statistical update, the state will reimburse municipalities for 100.0 percent of costs (up to $\$ 20$ per parcel). The level of reimbursement is reduced with each subsequent update, as prescribed in statute.

State Mandates. The Rhode Island General Laws require that the Department of Administration submit to the Budget Office a report by municipality of the costs of mandates established since January 1, 1979 to be reimbursed in the next fiscal year. The statute also required that the Budget Office annually include the statewide total of reimbursements for the next fiscal year in the annual budget.

The 2008 A ssembly adopted the Governor's recommendation to require that the Budget Office forward the costs for unfunded mandates to the Governor for consideration. Additionally, the state treasurer would reimburse the communities if a general appropriation is made by the General A ssembly.

Toll Reimbursement. The Rhode Island General Laws allow for members of the Newport and Jamestown fire and police departments and rescue personnel to be reimbursed for the cost of tolls on the Newport Bridge when using the bridge in the course of duty. The individuals are to be reimbursed by the municipality and the municipality reimbursed by the state.

State Support for Public Libraries. State law requires that the state provide financial support to public libraries. This includes an amount equal to 25.0 percent of second prior fiscal year local expenditures for library services as grants-in-aid. The same requirement applies to institutional libraries. Additionally, the state is required to fund 100.0 percent of the administrative and operating costs of the Rhode Island Library Network.

Library Construction Aid. The Rhode Island General Laws establish a library construction aid program, which is administered by the Office of Library and Information Services. The statute provides the authority to make grants-in-aid to a municipality or a free public library for the construction or capital improvements of any free public library designed to provide better services to the public.

Municipal Police Incentive Pay. The Rhode Island General Laws establish the Municipal Police Incentive Pay program. The purpose is to provide financial compensation to members of the state, city and town police departments, sheriffs and deputy sheriffs, members of the Rhode Island marshals' unit, Rhode Island capitol police, park police and conservation officers of the Division of Enforcement in the Department of Environmental $M$ anagement, and the state fire marshal and deputy fire marshals who have earned college credits in the field of police work.

The amount of the incentive is based on a point system, which is related to the individual's level of educational attainment. Payments are made by the state directly to the municipalities, which, in turn, make payments to the participants in the program.

As part of the FY 2009 budget, the Governor proposed legislation to eliminate this program. The Assembly maintained the program in the general laws, however has provided no funding since.

Municipal Firefighters Incentive Pay. The Rhode Island General Laws establish a Municipal Firefighters Incentive Pay program. The purpose of this program is to provide financial compensation to members of the municipal fire departments and fire districts, the Cumberland Rescue Department and emergency service technicians of the Town of Lincoln who have furthered their education at the college level.

The amount of the incentive is based on a point system, which is related to the individual's level of educational attainment. Payments are made by the state directly to the municipalities, which, in turn, make payments to the participants in the program.

As part of the FY 2009 budget, the Governor proposed legislation to eliminate this program. The Assembly maintained the program in the general laws; however, has provided no funding since.

Public Service Corporation Tax. The tangible personal property of telegraph, cable, and telecommunications corporations and express corporations used exclusively in conducting business for the corporation is exempt from local taxation, but is subject to taxation by the state. Tangible personal property includes lines, cables, ducts, pipes, machines and machinery, and equipment. The state passes the collections through to the local governments.

The 2009 A ssembly enacted legislation to freeze the tax rate at the FY 2008 level.
Local Meals and Beverage Tax. The 2003 A ssembly enacted a one percent additional tax or gross receipt from the sale of food and beverages sold in or on eating and drinking establishments. The tax is collected by the Division of Taxation and distributed back to the city and town which the meals and beverages were delivered. They total approximately $\$ 18.5$ million; they are not included in the totals or this publication.

Local Hotel Tax. The 2004 A ssembly enacted a one percent additional tax or transient guest tax receipt effective January 1, 2005 that is collected by the Division of Taxation and distributed to the city or town where the occupancy occurred (except for Newport, which collects and retains the one percent). They total approximately $\$ 1.9$ million, and are not included in the tables in this publication.

## Payment in Lieu of Taxes (PILOT)

Statute: Rhode Island General Laws: Section 45-13-5.1
Background: The Payment in Lieu of Taxes (PILOT) program reimburses cities and towns for property taxes which would have been due on real property owned by nonprofit educational institutions, nonprofit hospitals, or any state-owned hospital, veterans' residential facility or correctional facility, which is exempt from taxation by state law. Reimbursement is based on 27.0 percent of the tax that would have been collected if the property had been taxable, subject to appropriation. If the appropriation is less than the amount necessary to reimburse at 27.0 percent, the reimbursements are ratably reduced. The state makes one payment to communities in July of each year.

Significant Legislative Amendments: The General Assembly established the PILOT program in 1986 to provide payments in lieu of taxes for private nonprofit institutions of higher education and nonprofit hospital facilities. The rate of reimbursement was set at 25.0 percent of taxes that would have been collected if the property had been taxable. The statute required that payment be made no later than the third month of the fiscal year. The assessment reference date was the assessment immediately preceding the fiscal year in which the payment would be made.

| Session |  | Action |
| :---: | :--- | :---: |
| 1986 | Program established | Percent |
| 1987 | Changed assessment date; Budget Office must include payments | 25.0 |
|  | in budget effective FY 1989 | 25.0 |
| 1988 | Expanded type of eligible institutions | 25.0 |
| 1997 | Increased reimbursement effective FY 1998 | 27.0 |

The General A ssembly amended the statute in 1987 to change the assessment reference date to the preceding December 31, to require the Budget Office to include funding for the PILOT payments in the state budget beginning in FY 1989, and to require payment by July 31 of each fiscal year which allowed municipalities to record the revenues as a receivable in the fiscal year ending the prior June 30.

The 1988 Assembly expanded eligible institutions to include state-owned or operated hospitals, veterans' residential facilities, or correctional facilities occupied by more than 100 residents. This is the only expansion of eligibility since the program's inception. A minor amendment to the law in 1989 changed the assessment reference to the succeeding local assessment date, not necessarily December 31.

The 1997 A ssembly increased the rate of reimbursement to municipalities from 25.0 to 27.0 percent of taxes that would have been collected effective FY 1998.

The 2002 Assembly amended the law to allow a ratable reduction in payments to the appropriations.

Funding: Funds were not appropriated for the current PILOT program in FY 1990. For the period from FY 1991 to FY 1995, funding for the PILOT program ranged between $\$ 2.8$ million and $\$ 3.5$ million. In FY 1995, appropriations were increased to $\$ 12.2$ million to fully fund the program at 25.0 percent of taxes that would have been due. This required an increase of $\$ 9.4$ million over the FY 1994 budget.

Governor Almond recommended eliminating the program in his FY 1996 budget. However, the A ssembly did not concur and fully funded the program.

In FY 1998, the rate of reimbursement was increased to 27.0 percent. The program was fully funded from FY 1999 through FY 2002.

For FY 2003, the Governor recommended and the Assembly appropriated $\$ 18.2$ million, which was approximately 24.8 percent of the amount that would have been due from the exempt properties. The program was fully funded at 27.0 percent for FY 2004 at $\$ 21.7$ million. For FY 2005, the Assembly added $\$ 1.0$ million to the Governor's recommendation and funded the program at $\$ 22.7$ million, 26.3 percent of what would have been collected from the tax exempt institutions.

For FY 2006 the Assembly added $\$ 4.3$ million to the Governor's recommendation to fully fund the program at $\$ 27.0$ million, 27.0 percent of the property taxes which would have been collected.

For FY 2007 the Governor recommended $\$ 29.0$ million to fully fund the program and added T.F. Green Airport with payments phased in over two years, including $\$ 1.2$ million for FY 2007. The A ssembly enacted $\$ 27.8$ million, did not concur with the inclusion of T.F. Green Airport, and fully funded the existing program at 27.0 percent of forgone property taxes.

Since FY 2007, the Assembly has provided $\$ 1.0$ million annually so that the Rhode Island A irport C orporation can provide impact aid payments to the six state airports that shall be passed through to communities that host the airports. This is a separate award and not part of the Payment in Lieu of Taxes program. Sixty percent of the appropriated funds are to be distributed to each airport serving more than 1.0 million passengers based upon its percentage of the total passengers served by all airports serving more than 1.0 million passengers.

The remaining 40.0 percent is to be distributed to the six airports based on the shares of total take-offs and landings during calendar 2005. Each airport shall make payment to the cities or towns in which any part of the airport is located within 30 days of receipt of payment from the C orporation, and each community shall receive at least $\$ 25,000$.

For FY 2008, the Governor recommended $\$ 27.8$ million, freezing the aid payments at the 2007 enacted level and distribution. The A ssembly concurred.

The 2008 Assembly concurred with the Governor's proposal to provide $\$ 27.8$ million for FY 2009, which is the same as the FY 2008 enacted level. The total provided equates to 25.2 percent of eligible reimbursements, with distributions to communities reflecting updated data. The revised budget reduced payments for the program by $\$ 0.2$ million based upon a review of qualifying properties.

The FY 2010 budget provided $\$ 27.6$ million, which represents reimbursement of 23.9 percent of the value with total funding at the FY 2009 revised level.

The FY 2011 budget provided $\$ 27.6$ million for FY 2011, which represents reimbursement of 21.2 percent of the value.

The Governor recommended $\$ 27.6$ million for FY 2012, which represents a reimbursement of 19.4 percent. The Assembly provided \$33.1 million in FY 2012. The FY 2012 funding represents a reimbursement of 23.4 percent, which is 4.0 percent and $\$ 5.5$ million more than the Governor's recommendation. Distributions to communities reflect updated data and a ratable reduction to the appropriation.

Payment in Lieu of Tax Exempt Properties (in millions)

## Payment in Lieu of Taxes (PILOT) for Railroad C orporations

Statute: Rhode Island General Laws: Chapter 44-13.1
Background: Section 44-13.1-1 of the Rhode Island General Laws exempted railroad corporations from certain state taxes and local property taxes. The types of property exempt from local taxation under the statute included the following: rights of way, sidings, yard tracks, branches and spurs and the land under these improvements; vehicles, equipment, rolling stock and locomotives used for railroad purposes; and various types of buildings on railroad corporation property.

M unicipalities were required to calculate the amount of taxes that would have been due. This data was submitted to the Budget Office for inclusion in the state budget. The railroad corporations were required to pay this amount to the state, which then distributed the funds as aid to municipalities.

During the 1985 Session, the General A ssembly enacted a four-year phase out of the railroad corporations' payments in lieu of taxes beginning in FY 1996, at 25.0 percent per year. This also eliminated the payments made to the municipalities.

Funding: Final payments for the PILOT program from railroad corporations were made in FY 1990. The final payment totaled $\$ 271,351$.

## General Revenue Sharing Program

Statute: Rhode Island General Laws: Section 45-13-1; Section 42-61.2-7
Background: Beginning in FY 1994, one percent of total state tax revenues from the second prior fiscal year has been earmarked as state aid to cities and towns as general revenue sharing. The distribution formula, established in Section 45-13-1 of the R hode Island General Laws, is based on per capita income and local tax effort excluding that for education expenses. Distribution is based upon the calculation of tax effort divided by income squared, designated as R in the general laws. Funds are first allocated between the counties of the state based on each county's ratio of $R$ as compared to the calculation of R for the state as a whole. Then, within each county, the funds are allocated between the cities and towns based on these same formula and ratio comparisons. The data and calculations for FY 2009 are contained in A ppendix VIII.

The 1998 General Assembly began increasing the percentage of second prior year revenues dedicated to the General Revenue Sharing program as a mechanism for advanced reimbursement to municipalities for lost local revenues from the ten-year phase-out of the inventory tax. The rates were frozen at 1999 levels and reduced annually in 10 percent increments. FY 2008 is the last year for this tax, which will be 10 percent of the 1999 rate. The percentage of second prior year tax collections dedicated to the program was to increase on an annual basis through FY 2011 to a total of 4.7 percent. The 2007 A ssembly concurred with the Governor to freeze the share at 3.0 percent beginning in FY 2009, but the 2009 A ssembly subsequently adopted the Governor's recommendation to subject the program to appropriation. The 2005 A ssembly also dedicated a portion of video lottery terminal income to be distributed as general revenue sharing aid. The state traditionally makes the formula payments to communities in $M$ arch of each year although there is not a statutorily established date, and the supplemental payment from video lottery revenues at the end of June.

Significant Legislative Amendments: The State of Rhode Island has maintained a program of sharing state general revenues with municipalities since the late 1940s. Over time, sources of funding and mechanisms for distribution have changed.

In the mid-1980s, funding was derived from a specified percentage of combined sales and income tax receipts from the second prior fiscal year. In FY 1985, the amount was 1.2 percent of second prior fiscal year receipts. During the 1985 Session of the General Assembly, the percentage was increased to 2.0 percent for FY 1986 and all subsequent fiscal years. Funds were distributed based on the ratio of a municipality's tax levy to the total tax levy of all municipalities.

The 1987 General A ssembly changed the program significantly. First, it changed the program amounts to 6.1 percent of combined sales and income tax revenues from a defined reference year as state aid, while repealing various other statutes shown in the table below that had previously provided assistance to municipalities.

| RIGL | Topic |
| :---: | :--- |
| 3-10-10 | Disposition of Beverage Tax Proceeds |
| 41-4-14 | Tax on Pari-M utuel Betting |
| 44-5-38.1 | Payment in Lieu of Tax/Personal Property Tax on |
|  | M anufacturer's M achinery and Equipment |
| 44-5-42.1 | Payment in Lieu of Tax/Farm Equipment |
| 45-13-4 | Payment in Lieu of Tax/Intangible Personal Property |
|  | Tax on M anufacturer's Inventory |
| 45-13-5 | Payment in Lieu of Tax/L ocal Personal Property Tax on |
|  | M anufacturer's Inventory |

Second, it provided that in FY 1988 no municipality would receive less than 110 percent of the combined amounts received in FY 1987 from the repealed statutes, the General Revenue Sharing program and Section 44-5-42, relating to the exemption of certain farm property from taxation. For FY 1989 and all subsequent fiscal years, the amount of aid distributed would be no more than 105 percent of the prior fiscal year's distribution.

Third, it changed the distribution to the ratio of each municipality's product of population, tax effort and income to the total product of these variables for all municipalities. Prior to that time, tax levy was the only variable considered in the distribution of funds.

That was subsequently amended by the 1988 A ssembly to each city or town's ratio of the product of population, tax effort and income to the total product of these variables for cities or towns within a county area. The funds were distributed first by county based on the same type of calculation.

The 1991 Assembly repealed the existing General Revenue Sharing program and established a new program in its place. While the new program had the same distribution mechanism, the source of funding changed. The statute required distribution based on the amount included in the annual appropriations act. Beginning in FY 1994, one percent of second prior fiscal year total state tax revenues would be distributed as aid. This new program became effective for FY 1992.

The 1992 General Assembly clarified the statutes containing the 1988 distribution mechanism to the current formula.

The 2003 General A ssembly modified the census data to phase in per capita personal income from the 2000 census over ten years beginning in FY 2004 with 10.0 percent of the 2000 census data and 90.0 percent of the 1990 census data. The percents are adjusted annually over ten years until full phase in of the 2000 census data. This was done to ease the shock of new census data every ten years, with the other variables changing annually.

The 2005 Assembly provided that 6.25 percent of the state share of video lottery net terminal income solely attributable to new machines at Lincoln and Newport be dedicated to the program, up to a maximum of $\$ 10.0$ million to non-distressed communities based on the proportion of the general revenue sharing distribution for that year.

The 2006 Assembly converted the dedication of video lottery income from the state share of new machine income to 0.10 percent of the state's share all net terminal income up to a maximum of $\$ 10.0$ million to non-distressed communities based on the proportion of the general revenue sharing distribution for that year. The conversion was neutral, that is, the same amounts were achieved.

The 2007 Assembly concurred with the Governor to freeze the share at 3.0 percent beginning in FY 2009.

The 2009 Assembly enacted legislation to subject the General Revenue Sharing program permanently to appropriation; delete the requirement for a distribution of 3.0 percent of second prior year state tax revenues for FY 2010 and each year thereafter. The legislation also deleted the two-third requirements for repealing or amending the statute relating to the apportionment of aid.

Funding: As the graphic on the next page illustrates, no appropriation was made for the General Revenue Sharing program in FY 1993. In that year, funding was statutorily based on amounts included in the appropriations act.

Since FY 1994, the state has appropriated funding as required by statute. For the period from FY 1994 through FY 1998, this total was one percent of second prior year tax revenues. Funding increased by $\$ 6.0$ million in FY 1999 to account for the first increment of the inventory tax phase-out.

Governor Almond recommended eliminating the program in his FY 1996 budget; the General Assembly did not concur and provided full funding. Governor Carcieri proposed freezing the amount for FY 2004 at the FY 2003 level and at 2.6 percent of reference year revenues thereafter; the A ssembly did not concur and fully funded the program for FY 2004 and retained current law phase up to 4.7 percent in FY 2010.

For FY 2005, Governor Carcieri recommended $\$ 51.4$ million for general revenue sharing based on freezing general revenue sharing payments at the FY 2004 revised payment level for each community. He also recommended delaying the increase to 3.0 percent of the state's second prior tax collections until FY 2006 and the schedule of annual percentage increases by one year until it reaches 4.7 percent in FY 2011.

The Assembly concurred with the Governor, but added $\$ 1.0$ million for a total FY 2005 appropriation of $\$ 52.4$ million.

For FY 2006, the Governor recommended $\$ 1.0$ million more than FY 2005 or $\$ 53.4$ million and he recommended freezing the amount at 3.0 percent of the second prior year's general tax revenues forever, ending the phase up to 4.7 percent. His FY 2006 recommendation was $\$ 11.9$ million less than current law requirements. The A ssembly did not concur and restored $\$ 11.9$ million from general revenues to fully fund the program at current law requirements with continued phase up to 4.7 percent of the second prior year's general tax revenues in FY 2011.

Governor Carcieri recommended funding the General Revenue Sharing program for FY 2007 at $\$ 65.2$ million, which is $\$ 161,407$ less than enacted and included $\$ 487,500$ from dedicated revenues from new video lottery terminals. The recommendation was fixed to the level of appropriation for FY 2007, which was $\$ 16.1$ million less than current law requirements. The Governor also recommended freezing the amount at 3.0 percent of the second prior year's general tax revenues for FY 2008 and thereafter instead of the phase up to 4.7 percent in FY 2011 under current law.

The Assembly froze the program for FY 2007 and reinstated the phase up to 4.7 percent in FY 2011 as in current law. The Assembly included $\$ 65.1$ million for FY 2007 payments.

The 2007 A ssembly concurred with the Governor's proposal to freeze communities' FY 2008 aid payments at the FY 2007 level by using older reference data, and fix future amounts at 3.0 percent of tax revenues, ending the phase-up.

The 2008 A ssembly concurred with the Governor's recommendation for the FY 2008 revised budget, which provided a $\$ 10.0$ million proportional reduction in the original enacted aid to communities, for which the enacted budget included $\$ 65.1$ million to level fund communities at FY 2007 amounts.

For FY 2009, the Governor recommended $\$ 55.0$ million for the program. He included legislation contained in Article 15 of 2008-H 7390 to freeze the distribution of state share of video lottery terminal revenue at the FY 2008 enacted level. The recommendation reflects a ratable reduction of $\$ 10.0$ million and a further provision that includes a reduction of $\$ 96,011$ to assure that no community receives more aid in FY 2009 than the amount adopted for the FY 2008 enacted budget. This includes $\$ 7,430$ from East Greenwich, $\$ 41,018$ from East Providence, $\$ 41,064$ from Hopkinton, and $\$ 6,499$ from Little Compton. Communities' aid distributions would reflect updated data.

The 2008 A ssembly provided $\$ 55.1$ million, or $\$ 96,011$ more than recommended and changed the reference year data used for the distribution for formula to be the same as used for FY 2008 and FY 2009. This assures that each community receives the same amount of aid in FY 2009 as they did in FY 2008.

The Governor's FY 2009 revised budget proposed suspending the state's payments to communities in FY 2009. He subsequently submitted an amendment to restore $\$ 31.0$
million from the state fiscal stabilization fund to fund the program. The $\$ 31.0$ million would be distributed through the existing formula; however, communities would be required to allocate a portion to school budgets based on the percent of support for the school budget that the community supplied in FY 2007. Communities that contributed less than 5.0 percent would be required to allocate 100.0 percent of the general revenue sharing allocation to the schools. Communities that contributed between 5.0 percent and 25.0 percent would be required to allocate 75.0 percent, communities that contributed between 25.0 percent and 50.0 percent would be required to allocate 50.0 percent, and communities that contributed more than 50.0 percent would be required to allocate 25.0 percent to school budgets.

The A ssembly did not concur and provided $\$ 25.0$ million to fund the program in FY 2009, distributed proportionally on the same basis as the original enactment.

The FY 2010 budget does not include any funding for the General Revenue Sharing program, consistent with the Governor's recommendation. The Assembly enacted legislation to subject the program permanently to appropriation; deleted the requirement for a distribution of 3.0 percent of second prior year state tax revenues for FY 2010 and each year thereafter, and deleted the two-thirds requirement for repealing or amending the statute relating to the apportionment of aid. No funding has been provided since.

## General Revenue Sharing

## (in millions)

## Distressed Communities Relief Program

Statute: Rhode Island General Laws: Section 45-13-12 (Distressed Communities Relief Fund), Chapter 44-25 (Real Estate Conveyance Tax), Section 42-61.2-7 (Division of Revenue from Video Lottery Terminals).

Background: The Distressed Communities Relief program was established in 1990 to provide assistance to the communities with the highest property tax burdens relative to the wealth of the taxpayers. Section 45-13-12 of the General Laws establishes the four indices used to determine eligibility. These indices are percent of tax levy to full value of property, per capita income, percent of personal income to full value of property, and per capita full value of property. Effective FY 2006, any community falling into the lowest 20.0 percent (bottom eight rankings) for at least three of the four indices is eligible for assistance under the program.

The 2005 Assembly also mandated that when a new community qualifies, that community receives 50.0 percent of current law requirements the first year it qualifies. The remaining 50.0 percent is distributed to the other distressed communities proportionately. When a community falls out of the program, it receives a one-time transition payment of 50.0 percent of the prior year's full funding.

Funds are distributed based on the ratio of an eligible municipality's tax levy to the total tax levy of all eligible municipalities. Payments are made in $M$ arch and A ugust of each year. Since the inception of the program, only seven communities have received funding through this program. The communities are Burrillville, Central Falls, North Providence, Pawtucket, Providence, West Warwick, and W oonsocket. For FY 2012, North Providence qualified for distressed aid and Burrillville and East Providence disqualified. The data and calculations for FY 2012 are shown in A ppendix VI.

The state makes two payments each year to communities, one in March and one in A ugust.

Significant Legislative Amendments: During the 1992 Session, the General A ssembly passed legislation authorizing the State Lottery Commission to operate video lottery terminals. Section 42-61.2-7 of the Rhode Island General Laws dedicates a portion of the net terminal income to the Distressed Communities Relief program. In FY 1993, the contributions to the program would come from the share of the net terminal income due the retailers, kennel owners and technology providers. Beginning in FY 1994, the first $\$ 5.0$ million from the state's share of net terminal income would be dedicated to the program.

The 1993 A ssembly amended the statute so that $\$ 3.0$ million would be from the state's share of net terminal income in FY 1994 with the remaining $\$ 2.0$ million split as follows: $\$ 1,152,683$ from the retailers, $\$ 218,579$ from the kennel owners, and $\$ 628,737$ from the technology provider. The kennel owners' share was eventually eliminated, so the 2005 A ssembly made a technical correction to the division of revenue
from video lottery proceeds to simply dedicate $\$ 5.0$ million from general revenue collections to this program.

The 2004 Assembly agreed with the Governor's budget proposal to eliminate the link between the real estate conveyance tax and the program for FY 2004 and FY 2005 only. The real estate conveyance tax is $\$ 2.00$ per $\$ 500$ paid for the purchase of property (including the value of any lien or encumbrance remaining at the time of sale), with $\$ 0.30$ dedicated to the Distressed Communities program. Of the remainder, $\$ 0.60$ goes to state general revenues for state use and the remaining $\$ 1.10$ stays with the community where the tax was collected. The A ssembly included A rticle 16 of 2004-H 8219 Substitute A, as amended, to effectuate this change. For FY 2004 and FY 2005 only the $\$ 0.30$ dedicated share of the real estate conveyance tax would be transferred to the state general fund. Thereafter beginning in FY 2006, the program reverts back to usage of dedicated funding from the real estate conveyance tax. The Assembly included funding for FY 2005 of $\$ 8.5$ million, $\$ 1.0$ million more than the Governor's recommendation.

The Governor recommended level funding the program at $\$ 8.5$ million in his FY 2005 revised and FY 2006 budget recommendations, which was $\$ 1.4$ million less for FY 2006 than required under current law, based on the November 2004 Revenue Conference estimates. He recommended amending the law to make the amount permanently subject to appropriation.

The A ssembly did not concur and added $\$ 1.0$ million from general revenues above the Governor's FY 2005 revised recommendation to fully fund the program at current law requirements. In prior years, payments were made to distressed communities in A pril and in August, over two separate budget cycles. The 2004 A ssembly changed the payment cycle. It moved to a September and A pril payment schedule, both within the same state fiscal year. The state inadvertently omitted the A ugust payment, which was always a receivable to the communities and a payable by the state. This corrected the oversight and provided the $\$ 1.0$ million to make program payments current.

The Assembly provided $\$ 10.0$ million for the program for FY 2006. This was $\$ 1.4$ million more than the Governor's recommendation based on full funding and updated information from the M ay 2005 Revenue Estimating Conference. The 2005 A ssembly changed the distribution of program funds in Article 11 of $2005-\mathrm{H} 5270$, Substitute A by amending the law to allow communities to qualify as distressed if they fall into the lowest 20.0 percent for at least three of the four indices used to determine eligibility, or the eight lowest ranked communities. Prior to this change communities qualified if they fell into the lowest 15.0 percent for at least three of the four indices used to determine eligibility, or the six lowest ranked communities.

The 2005 A ssembly provided that 12.5 percent of the state share of video lottery net terminal income solely attributable to new machines at Lincoln and Newport up to a maximum of $\$ 20.0$ million per year be dedicated to the program.

The 2005 Assembly also mandated that when a new community qualifies, that community receives 50.0 percent of current law requirements the first year it qualifies. The remaining 50.0 percent is distributed to the other distressed communities proportionately. When a community falls out of the program, it receives a one-time transition payment of 50.0 percent of the prior year's full funding.

The Governor recommended full funding for the Distressed Communities Relief Fund at $\$ 11.7$ million for FY 2007, which is $\$ 1.8$ million more than enacted. Funding included $\$ 975,000$ from new revenues from the video lottery terminals per statutory requirement. The A ssembly included $\$ 10.9$ million for FY 2007, which is $\$ 1.0$ million more than enacted but $\$ 0.8$ million less than the Governor's recommendation. The decrease is based upon lower estimates of collections of real estate transfer taxes by the M ay Revenue Estimating Conference, which are dedicated to the program.

The 2006 A ssembly also converted that dedication to 0.19 percent of all net terminal income up to $\$ 20.0$ million per year; the 12.5 percent new machine revenue. The conversion was neutral, that is, the same amounts were achieved.

The 2007 A ssembly concurred with the Governor's proposal to fund FY 2008 aid at the FY 2007 entitlement, or $\$ 10.4$ million total. The 2007 A ssembly also concurred with the Governor's proposal to convert this to a general revenue appropriation.

The 2008 A ssembly concurred with the Governor's proposal to freeze the amount of video lottery revenues dedicated to this program at the FY 2008 level and provided $\$ 10.4$ million. This is $\$ 144,532$ less from the video lottery revenues because of the freeze. Communities' aid distribution for FY 2009 is based on updated qualifying tax levies.

Funding: Funding for the Distressed Communities Relief fund had been derived from two sources of revenues, the real estate conveyance tax and video lottery terminal revenues. The 2009 A ssembly funded the program solely with general revenues.

The Governor's FY 2010 recommended budget included $\$ 10.4$ million for FY 2010, consistent with the enacted budget. He recommended using $\$ 10.0$ million of the total $\$ 30.0$ million available from the flexible portion of the federal stabilization funds in lieu of general revenues. Communities' aid distribution for FY 2010 is based on updated qualifying tax levies and assumes all aid is distributed using the same method. Aid from video lottery terminal resources are shared equally unlike the weighted allocation of the majority of the funds.

The Assembly did not concur with the Governor's proposal to fund the program with the stimulus funds; it provided $\$ 10.4$ million from general revenues. It also enacted legislation to subject the video lottery terminal funding to appropriation and clarified how much of the appropriation will be distributed equally to each qualifying distressed community.

The 2010 A ssembly concurred with the Governor's recommendation to provide $\$ 10.4$ million from general revenues for the program in FY 2011.

The Governor recommended $\$ 15.6$ million in FY 2011, which reflects an increase of $\$ 5.2$ million in funding to eligible communities who meet certain financial reporting requirements. His FY 2012 recommendation reverts to the enacted level of $\$ 10.4$ million. Communities' aid distribution is based on updated qualifying tax levies. The 2011 A ssembly provided $\$ 10.4$ million in both years to fund the program.

Distressed Communities Relief Program (in millions)

While FY 1994 was the first year receipts from net terminal income were dedicated to the program, full payment was not made due to a lawsuit regarding the distribution of funding. The disputed portion of the FY 1994 payment was made in FY 1995.

## M otor Vehicle Excise Tax Phase-Out

Statute: Rhode Island General Laws: Title 44, Chapter 34.1; Section 42-61.2-7
Background: The 1998 General Assembly enacted legislation to phase out the property tax on motor vehicles and trailers. The exemption is a reduction in the assessed value subject to taxation. The V ehicle Value Commission sets the assessed values of vehicles using data from the National Automobile Dealers Association (NADA). Cities and towns are paid by the state for the lost taxes due to the exemptions. In addition, local tax rates on vehicles are frozen to the FY 1998 level. The state makes four annual quarterly payments to the communities in the months of A ugust, November, February and May.

Significant Legisative Amendments: The 1998 General A ssembly enacted legislation to phase out the property tax on motor vehicles and trailers beginning with FY 2000 tax bills, and ending in FY 2006 when the tax would be totally eliminated. The 2000 A ssembly amended the statute to extend the phase-out for one year through FY 2007; the 2002 A ssembly amended it further to provide for a permanent $\$ 4,500$ exemption for FY 2003 and beyond. The phase-out was reinstated for FY 2006 with increased exemptions tied to new video lottery terminal income. For FY 2007, the exemption is \$6,000.

The V ehicle V alue Commission sets the assessed values of vehicles using data from the National A utomobile Dealers A ssociation (NADA) beginning with assessments for FY 2000. Prior to FY 2000, a Rhode Island sales adjustment was applied to many vehicles, which had the impact of altering the average retail value used for tax purposes. This method produced wide variations and inequities from year to year. The sales adjustment is no longer being used, which had the impact of increasing the values of some vehicles for FY 2000 tax purposes. Taxpayers were held harmless from the increases due to the change, paying FY 2000 taxes equal to FY 1999 payments.

The 1998 legislation froze local tax rates at FY 1998 levels, but provided for annual adjustments to the rates for purposes of reimbursing cities and towns for that freeze. The legislation used the consumer price index-all urban consumers as a surrogate for the amounts rates would have increased. The 2003 Assembly adopted Governor Carcieri's recommendation to end these adjustments beginning in FY 2004.

Governor Almond proposed to the 2000 and 2001 Sessions of the General Assembly that the exemption be frozen at $\$ 2,500$. The A ssembly did not concur in either year. He proposed freezing it at $\$ 3,500$ to the 2002 Session for both FY 2002 (retroactively) and FY 2003. The 2002 A ssembly adopted a permanent exemption of $\$ 4,500$ for $F Y$ 2003 and beyond.

The 1998 legislation required reimbursement to cities and towns from the state for the lost taxes due to the exemptions and, as noted above, the frozen rates. Reimbursements were made on the basis of the entire local tax bases, assuming collection history of 100
percent, which rarely occurs, if ever. Prior to FY 2003, the reimbursements were made one year in advance, and then reconciled on final payment. The initial legislation specified that when the tax was eliminated, cities and towns would receive permanent shares of a dedicated percentage of the sales tax.

The 2000 Assembly eliminated the authority of fire districts to levy motor vehicle excise taxes. The fire districts would be reimbursed for 100 percent of the lost revenues beginning in FY 2001. This was enacted as part of A rticle 19 of the FY 2000 A ppropriations Act. Sufficient funds were appropriated to cover the costs of this action. The Assembly then eliminated the ability of municipalities to charge a minimum tax beginning in FY 2002. Section 44-34-2 of the General Laws established a minimum tax of $\$ 5$.

The 2002 A ssembly amended the payment schedule to four installments during the fiscal year on August $20^{\text {th }}$, November $20^{\text {th }}$, February $20^{\text {th }}$, and M ay $20^{\text {th }}$, beginning in FY 2003. In prior years, the first and second payments were made on October $20^{\text {th }}$ and February $20^{\text {th }}$ of each year equal to 25.0 percent of the estimated reimbursement. The third payment was made on June $20^{\text {th }}$ of each year equal to the remaining 50.0 percent of the estimated reimbursement.

The Governor included legislation in his FY 2010 revised budget to eliminate the third and the fourth quarter reimbursements to municipalities. The proposed legislation would allow municipalities to levy a supplemental tax to capture the loss of the reimbursement for FY 2010 subject to property tax cap laws. For FY 2011 and thereafter, the future exemptions would be subject to the annual appropriations.

The 2010 A ssembly had not taken action on the Governor's budget and the third quarter payment, which was due on February 1, was made. The Assembly provided an additional $\$ 16.4$ million, for total funding of $\$ 117.2$ million to fund the program at 88.0 percent of the amount that would have been due in FY 2010.

The 2010 Assembly restored the authority for fire districts to levy a motor vehicle excise tax. The Assembly changed the exemption amount from $\$ 6,000$ to $\$ 500$, and allowed municipalities to provide an additional amount above $\$ 500$; however, that additional amount would not be subject to reimbursement. It also removed the provision that restricted municipalities from taxing the difference in the event that the value of a vehicle is higher than the prior fiscal year. It also allowed for rates to be lowered from the current frozen levels.

The 2010 A ssembly provided $\$ 10.0$ million for $F Y$ 2011. Effective for fiscal year 2011 and thereafter, the Assembly restored the authority for fire districts to levy a motor vehicle excise tax.

The 2011 A ssembly concurred with the Governor's recommendations to level fund the program in FY 2011 and FY 2012 at the $\$ 10.0$ million enacted amount.

*Reimbursed FY 2010 at 88.0 percent of amount due
Funding: Reimbursement to the cities, towns and fire districts are funded from annual general revenue appropriations on the basis of the amount lost to the cities and towns resulting from the exemptions in the legislation. The phase-out of the motor vehicle and trailer excise taxes was passed as part of the FY 1999 Appropriations Act. The advance reimbursements to municipalities began in that year with total requirements of \$22.1 million.

The 2002 A ssembly did not concur until the Governor's recommendation to reduce the FY 2002 aid to cities and towns but appropriated funds for an advance reimbursement for FY 2002 and the FY 2003 exemption level of $\$ 4,500$. A ppropriations for FY 2004 did not contain additional inflation adjustments, and reflected changes only for estimated value changes.

Governor Carcieri recommended that state reimbursement of lost excise tax revenues to cities and towns be based upon the prior local fiscal year vehicle values. The change in reimbursement from a concurrent to a prior local fiscal year basis would begin in FY 2005. The A ssembly concurred.

The Governor recommended full funding of $\$ 105.0$ million for the $\$ 4,500$ exemption for FY 2006 and technical language ending the eventual repeal of the tax. The 2005 A ssembly did not concur and added $\$ 7.3$ million from general revenues to increase the vehicle value exemption from $\$ 4,500$ to $\$ 5,000$ per vehicle. The A ssembly also passed Article 17 of $2005-\mathrm{H} 5270$, Substitute A to allow for advance reimbursements to communities based on current year property values rather than prior local fiscal year values.

The 2005 A ssembly also passed legislation dedicating 78.125 percent of the state share of video lottery net terminal income solely attributable to new machines at Lincoln and Newport up to $\$ 10.0$ million per year to the program to end the car tax by increasing the exemption in $\$ 500$ increments until it is ended.

Governor Carcieri recommended $\$ 129.1$ million for FY 2007 to fund a $\$ 5,500$ exemption based on the revenues from new video lottery terminals dedicated to the program. The estimated requirement to achieve an additional $\$ 500$ exemption is $\$ 7.5$ million. The new machine revenue was estimated at $\$ 6.1$ million for $F Y 2007$, and the Governor recommended supplementing the machine revenues with general revenues to increase the exemption to $\$ 5,500$ in FY 2007.

The 2006 A ssembly included $\$ 136.0$ million to reimburse communities for a $\$ 6,000$ car tax exemption for FY 2007. This is $\$ 23.7$ million more than enacted, and $\$ 6.9$ million more than the Governor recommended for FY 2007. This is a $\$ 1,000$ vehicle value exemption increase compared to the FY 2006 enacted budget, and $\$ 500$ more than the Governor had recommended for FY 2007. The 2006 Assembly also converted the dedicated funding to 1.22 percent of all net terminal income up to $\$ 10.0$ million per year and provided that the amount of the vehicle value exemption increase to the nearest $\$ 250$ increment, and the amount cannot be less than the prior year's exemption. The conversion was neutral, that is, the same amounts were achieved.

The Governor recommended $\$ 140.6$ million to maintain the car tax phase-out for FY 2008 at $\$ 6,000$. The 2007 A ssembly provided $\$ 135.5$ million for FY 2008 based upon updated data. This maintains the tax rate freeze and provision for annual increases in the limit based on increases in video lottery terminal proceeds.

The 2008 A ssembly adopted the Governor's proposal to permanently reduce the M otor Vehicles Excise Tax reimbursements to 98.0 percent of the calculated reimbursement beginning with FY 2008. Communities must give the $\$ 6,000$ exemption; however, would effectively be reimbursed for $\$ 5,880$ under this plan to be more in line with collection rates. The Assembly provided $\$ 135.3$ million for FY 2008 and $\$ 139.6$ million for FY 2009 based upon updated data.

The Governor's revised budget includes $\$ 135.4$ million or $\$ 4.2$ million less than the $F Y$ 2009 enacted budget to reflect updated data, which shows that the growth rate from FY 2008 to FY 2009 was actually 0.1 percent. The enacted budget assumed a growth rate of 3.2 percent. The Governor's FY 2010 budget includes $\$ 135.3$ million to fund the program and maintains the $\$ 6,000$ exemption; however, it assumes no growth in values from FY 2009 for which growth was 0.1 percent above FY 2008. The Assembly concurred with the Governor's recommendations.

The Governor included legislation in his FY 2010 revised budget to eliminate the third and the fourth quarter reimbursements to municipalities. The proposed legislation would allow municipalities to levy a supplemental tax to capture the loss of the reimbursement for FY 2010. This is subject to certification from the Department of Revenue. The law further requires an affirmative vote of at least four-fifths of the full membership of the municipal's governing body. For FY 2011 and thereafter, the legislation subjects future exemptions to the annual appropriations act.

The Assembly had not taken action on the Governor's budget and the third quarter payment, which was due on February 1, was made. The Assembly provided an additional $\$ 16.4$ million, for total funding of $\$ 117.2$ million to fund the program at 88.0 percent of the amount that would have been due in FY 2010.

For fiscal year 2011 and thereafter, the Assembly enacted legislation that mandates a $\$ 500$ exemption for which the state will reimburse municipalities an amount subject to appropriation. The legislation further allows municipalities to provide an additional exemption; however, that additional exemption will not be subject to reimbursement. The Assembly also removed the provision that restricted municipalities from taxing the difference in the event that the value of a vehicle is higher than the prior fiscal year. It also allowed for rates to be lowered from the current frozen levels.

The Assembly provided $\$ 10.0$ million for FY 2011. The Assembly did not provide funding for fire districts beyond FY 2010 but for fiscal year 2011 and thereafter, it restored the authority for fire districts to levy a motor vehicle excise tax.

The 2011 A ssembly concurred with the Governor's recommendations to level fund the program in FY 2011 and FY 2012 at the $\$ 10.0$ million enacted amount.

## M otor Vehicle Excise Tax Phase-Out - Replacement Aid to Local G overnments

The following table shows the exemptions by municipalities and the current tax rates.

# Property Revaluation Reimbursements 

Statute: Rhode Island General Laws: Section 44-5-11.6
Background: Section 44-5-11.6 mandates property revaluations and statistical updates according to a schedule defined in statute. Once fully implemented, all municipalities will be required to complete full revaluations every nine years with statistical updates in the third and sixth years following the full revaluation.

The statute defines a transition period for communities having conducted or implemented revaluations as of 1993 or later. During 2000 through 2003, these communities will be required to complete a statistical update with a full revaluation three years later. For all other municipalities, the statute defines a schedule for two statistical updates before a complete revaluation will be required. A table showing the next statistical updates and full revaluations is shown on the next page. The implementation dates are December 31 of the years shown.

The statute also requires that the state reimburse municipalities for 100 percent of the cost of the first update, not to exceed $\$ 20$ per parcel. Reimbursements for subsequent updates are set in statute at 80.0 percent (up to $\$ 16$ per parcel) for the second statistical update and 60.0 percent (up to $\$ 12$ per parcel) for the third and all subsequent updates. A distressed community will receive 80.0 percent reimbursement for the second and all subsequent updates. The state reimbursement is made upon receipt of bills for completion of the revaluation.

Significant Legislative Amendments: Legislation was passed by the 1997 A ssembly to implement the statistical updates. The original statute provided for per-parcel reimbursements of $\$ 15$ for the first update, $\$ 10$ for the second, and $\$ 6$ for the third and all subsequent updates. These levels were increased by the 2000 A ssembly based on the actual costs of the contracts that have been entered into by a number of municipalities. The actual costs were closer to $\$ 20$ than $\$ 15$, and the limits were increased in an attempt to provide 100 percent reimbursement for the first updates.

Funding: Expenditures of $\$ 1.5$ million were reimbursed in FY 2001, and the state reimbursed $\$ 1.0$ million for FY 2002 and $\$ 1.3$ million for FY 2003. FY 2004 reimbursements were $\$ 2.5$ million. They were $\$ 0.6$ million in FY 2005, $\$ 0.9$ million in FY 2006, $\$ 2.2$ million in FY 2007, $\$ 1.1$ million in FY 2008, $\$ 1.0$ million in $F Y$ 2009 and $\$ 1.5$ million in FY 2010.

The 2011 A ssembly concurred with the Governor's recommendation to provide funding of $\$ 0.8$ million for FY 2011 and $\$ 1.1$ million for FY 2012 to reimburse communities conducting property valuation updates.

## State M andates

Statute: Rhode Island General Laws: Sections 45-13-7 through 45-13-10
Background: Section 45-13-9 of the Rhode Island General Laws requires that the Department of Administration submit to the Budget Office a report by municipality of the costs of mandates, established since January 1, 1979, to be reimbursed in the next fiscal year. A mandate is defined as "any state initiated statutory or executive action or rule, regulation or policy adopted by a state department or agency or a quasi-public department or agency that requires a local government to establish, expand, or modify its activities in such a way as it necessitates additional expenditures from local revenue sources where the expenditures are not otherwise reimbursed in whole or in part."

The statute requires that the Budget Office annually include the statewide total of the costs of state mandates to be reimbursed in the next fiscal year in the budget. Funds are to be distributed in July of each year. Data regarding the reimbursable costs is collected in A pril of each year for the preceding July 1 to June 30 period.

Funding: Expenditures totaled $\$ 76,389$ and $\$ 150,106$ for FY 1990 and FY 1991, respectively. In FY 1992, expenditures were $\$ 102,316$. This was the last year in which funds were appropriated for state mandate payments.

The 2008 A ssembly adopted the Governor's recommendation contained in Article 18 of 2008-H 7204 to require that the Budget Office forward the costs for unfunded mandates to the governor for consideration. Additionally, the state treasurer would reimburse the communities if a general revenue appropriation is made by the General A ssembly.

## Toll Reimbursement - Newport/J amestown

Statute: Rhode Island General Laws: Section 24-12-26
Background: The Rhode Island General Laws allow for members of the Newport and Jamestown fire and police departments and rescue personnel to be reimbursed for the cost of tolls on the Newport Bridge when using the bridge in the course of duty. The individuals are to be reimbursed by the municipality, and the municipality reimbursed by the state.

Funding: In order for payment to be made, the municipality must request reimbursement from the state. Payments have been made in only five of the last thirteen years. These totaled \$11,743 in FY 1994, \$1,166 in FY 1995, \$3,247 in FY 1997, \$2,227 in FY 2000 and $\$ 2,200$ in FY 2001.

The City of Newport has not requested its reimbursement since FY 1999 and Jamestown has not sought its reimbursements for FY 2009 and FY 2010. The FY 2011 final budget included $\$ 53,000$ for toll expenses; however, the City of Newport did not submit the required invoices. Jamestown has been reimbursed $\$ 7,000$.

# State Support for Public Libraries 

Statute: Rhode Island General Laws: Title 29, Chapter 6
Background: Various sections of Chapter 29-6 of the Rhode Island General Laws, entitled "State Aid to Libraries," require that the state provide financial support to public libraries. The requirements of the sections are outlined below.

Grant-in-Aid. Section 29-6-2 of the Rhode Island General Laws requires that the state share of support to public libraries be 25.0 percent of the amount appropriated and expended in the second prior fiscal year by the municipality from local tax revenues. The funding was increased over time as specified by the statute until FY 2000 and the total amount has been 25.0 percent of the second prior fiscal year since then.

For some years previously, under the section of state law that deals with the statewide library network, public libraries also received resource sharing funding to participate in the Cooperating Libraries Automated Network (CLAN). At the time the program was changed to the current grant type program, a number of communities would have received less than they had received previously. Those communities have been held harmless, with the balance of the funds distributed proportionately. The hold harmless concept was phased out over a three year period through FY 2006. Effective FY 2007, no communities would be held harmless any longer under the grant program.

The law was amended in 2002 in Article 7 of the FY 2003 Appropriation Act to provide for proportional reductions in the event that the grants would exceed the amount appropriated. In 2003 A rticle 20 of the FY 2004 A ppropriation Act was added stating that as to only the Providence Public Library, additional state aid would be provided based on the income from the investments in that library's endowment funds that are used to supplement the municipal appropriation, in an amount up to 25.0 percent of six percent of the three year average market value, calculated at the end of the calendar year preceding the fiscal year that expenditures are certified for the purpose of determining state aid. The 2004 A ssembly further amended the law to allow inclusion of all other public libraries that use endowment funds to supplement the municipal appropriation. The state makes Library grant-in-aid payments to communities in December, M arch and M ay.

Procedure and Waiver Request. Rhode Island General Law 29-6-3 requires a city or town to appropriate from local tax revenues an amount not less than the amount appropriated the previous year from local tax revenues and expended for library operating expenses in order to be eligible to receive library state aid. The chief library officer annually determines each municipality's compliance with the maintenance of effort by comparing appropriation and expenditure amounts as reported by the libraries or the municipalities. The data to determine eligibility is generally provided by midSeptember. In the event that a municipality has failed to meet the maintenance of effort requirement, the chief library officer will notify the municipality that it is not eligible for a state grant in aid.

A municipality that is deemed ineligible may request a waiver from the requirement by submitting a letter to the chief library officer to include the following information:

- The amount of the appropriation that would be required to meet the maintenance of effort requirement and evidence that the municipality, through its regular budget process, has appropriated an amount that is inadequate to meet the requirement
- The impact the reduction will have on library services, including the services that will be reduced

A municipality requesting a waiver is required to demonstrate that the decrease in funding of library services is comparable to decreases in funding for other municipal services. The chief library officer will respond in writing to requests for waivers within six weeks of requests. If a request for wavier is denied, the municipality may appeal the decision by sending a letter of appeal to the Chair of the Library Board. The appeal will be heard by the Library Board at its regular meeting or within six weeks, whichever comes first. The municipality will be notified of the Board's decision within 10 days of the appeal hearing.

Support of Institutional Libraries. Section 29-6-7 of the General Laws requires that support for library services at state supported residential institutions and the School for the Deaf be funded at 25.0 percent of the amount appropriated and expended in the second prior fiscal year by the institution. The institutional libraries that qualify to receive grant-in-aid are located at the Adult Correctional Institution, the Eleanor Slater Hospital, the Training School, and the School for the Deaf.

Resources Sharing/Library Network. Section 29-6-9 of the Rhode Island General Laws outlines the responsibilities of the Office of Library and Information Services in providing each citizen of the State of Rhode Island with equal opportunity of access to resources to satisfy information needs and interests. Subsection (a) requires that the Office of Library and Information Services include in its annual budget funds for the administration and operations of the Rhode Island Library Network. This includes sufficient funding to:

- Provide central support for the library network, including delivery of materials, telecommunications, consultant services, and access to bibliographic and other information sources;
- Reimburse libraries for the actual cost of providing services to individuals outside the library's primary clientele; and
- Support the development, maintenance of and access to the resource sharing potential of specialized collections and services provided by the Providence Public Library and other public libraries.

Subsection (b) requires that, by FY 2000, the State of Rhode Island would provide from state and federal sources 100 percent of the funding for certain statewide library services. These services are:

- Reference Resource Center at the Providence Public Library;
- Interlibrary delivery system;
- Interlibrary telecommunications system;
- Electronic Interlibrary Ioan system; and
- Statewide catalog of all library holdings.

Subsection (c) allows for the state to provide resources, subject to appropriation for continuing statewide access to databases.

Reference Resource Center at the Providence Public Library. The reference resource grant to the Providence Public Library is designed to allow the library to develop its reference collection, extend its hours to provide accessibility to its services, enabling it to provide statewide reference research for all Rhode Island libraries and residents. Additionally the reference research service provides research expertise in specialized areas such as patents and private foundation funding, reference and computer training for library staff throughout the state, database access via the Internet for public libraries and public library cardholders, and online reference service via email and live help as the "AskRI.org" service, available through public library websites and the Rhode Island state website, RI.Gov.

Interlibrary Delivery System. The Office of Library and Information Services is responsible for funding the interlibrary delivery system. This system includes the delivery of books, audio/visual materials and other resources which are shared between and among more than 180 public libraries, academic libraries, state institution libraries, school libraries and other special libraries (such as the R hode Island Historical Society). Over three million items were delivered in FY 2006 through the system. The contract with the private vendor providing the services is based on the number of stops made, not on the number of items delivered.

There is not only a statutory requirement for full funding as stated in Section 29-6-9 (b), this function is also covered under subsection (a) of the same section of the general laws as a function for which the Office of Library and Information Services must annually include funding in its budget.

With ongoing funding from a federal grant, a cooperative automation system called RILINK serves 69 school libraries in Rhode Island. Membership fees from participating schools support the RILINK network. The Office of Library Information and Services has managed to budget federal sub-grants to fund growth of RILINK to include an increasing number of schools. Using RILINK school libraries can share materials with other RILINK member libraries as well as with all other libraries in the RI Resource Sharing/Library Network. Additional stops of the delivery service are required at schools as new members join the system.

Interlibrary Telecommunications System. The Office of Library and Information Services assists libraries in obtaining discounts for telecommunications and Internet access through the Telecommunications Education A ccess Fund, commonly known as

E-Rate, established in February 2003 with passage of 2003-S 843 which provides funding to qualified libraries and schools to assist in paying the cost of acquiring and using telecommunications technologies to access the Internet. The State Telecommunication Education Access Fund also provides telecommunications to libraries and is administered by the Department of Education.

Electronic Interlibrary Loan System. The Office of Library and Information Services contracts with the Online Computer Library Center (OCLC) for services related to interlibrary loan services and other on-line information from libraries around the world, which are also OCLC members. Expenditures budgeted in the Office of Library and Information Services operating budget include an annual membership fee and fees for services provided.

Statewide Catalog of all Library Holdings. The Office of Library and Information Services is using an online service called "Relais" that interconnects all of Rhode Island's online library catalogs and facilitates the discovery, request, tracking and return functions of interlibrary loan. The catalogs are Ocean State Libraries (public libraries, OLIS and St. George's School), HELIN (academic libraries and hospitals) and RILINK (K-12 schools) can provide access to the on-line holdings of Rhode Island libraries using the Internet. The means exist to provide the ability to search all of the on-line library catalogs at one time to determine if a book is currently on the shelf at a library and available.

Funding: The interlibrary delivery system and the electronic interlibrary loan system are funded through the operating budget of the Office of Library and Information Services. These components are not considered state aid. Funds are not required at this time for the interlibrary telecommunications system.

Only the grant-in-aid funding for the Statewide Reference Resource Center at the Providence Public Library and grants to institutional libraries are considered state aid. The components that are considered state aid are funded with state general revenues. The table shows the grants in aid funding since FY 1989.

As the table illustrates, funding remained relatively stable for the period from FY 1991 through FY 1997. In FY 1998, the General A ssembly appropriated an additional $\$ 1.0$ million to begin increasing funding to meet the requirement of 25.0 percent for the grant-in-aid program by FY 2000. An additional increase of $\$ 1.2$ million was appropriated for FY 1999 to continue the trend toward 25.0 percent funding for the grant-in-aid program. In the FY 2000 budget, the Assembly added \$2,029,726 over FY 1999 funding to reach the required level of a total of 25.0 percent for grants-in-aid, where it has remained.

| Fiscal Year | Grant-In-Aid | Percent of L ocal <br> Expenditures | Percent of <br> Endowment <br> Expenditures* | Reference <br> Year |
| :---: | :---: | :---: | :---: | :---: |

| 2010 | $8,773,398$ | $25.00 \%$ | $25.00 \%$ | 2008 |
| 2011 | $8,773,398$ | $25.00 \%$ | $25.00 \%$ | 2009 |
| 2012 | $8,773,398$ | $25.00 \%$ | $25.00 \%$ | 2010 |

*Providence only in FY 2004; all capped at 6\% of the three-year average market value of investments in the endowment.

The Governor recommended that the statute be changed in his FY 2003 budget to make funding subject to appropriation, and froze the level at that enacted for FY 2002. The A ssembly concurred with the statutory change, but included funding for the 25.0 percent level.

The 2003 A ssembly amended the law to allow inclusion of endowment funding as part of local effort for Providence, which resulted in additional funding of $\$ 654,835$ for FY 2004. The 2004 A ssembly further amended the law to allow inclusion of all other statewide libraries that receive endowment funding. This resulted in additional expenditures to state support for libraries in the amount of $\$ 224,544$ for FY 2005. The 2005 A ssembly passed legislation (2005-H 5170 Substitute A) requiring any library that funded a majority of its operational budget in the prior year with public funds to be subject to the open meetings law.

The FY 2006 budget included $\$ 8.4$ million to fully fund library aid, which includes $\$ 0.9$ million in endowment based funding for various libraries. The FY 2007 budget included $\$ 8.7$ million for library aid. The FY 2008 budget included $\$ 8.8$ million for
library aid, which includes $\$ 1.1$ million in endowment based funding for various libraries.

The 2008 Assembly concurred with the Governor's recommendation to provide $\$ 8.8$ million for FY 2009 library operating aid. The A ssembly also enacted legislation to reduce the maintenance of effort requirement for municipalities to provide library services to at least 80.0 percent of the previous year for just FY 2009. The 2009 Assembly also froze the maintenance of effort requirement at 80.0 percent for FY 2010.

The 2011 Assembly concurred with the Governor's recommendation to provide $\$ 8.8$ million for FY 2012 library operating aid. Communities' distributions reflect updated data.

The following graph shows total state funding for library services, grant-in-aid payments, and the grant to the Providence Public Library for the Statewide Reference Resource Center.

## State Support for Public Libraries (in millions)

[^1]
## Library Construction Aid

Statute: Rhode Island General Laws: Section 29-6-6
Background: Section 29-6-6 of the Rhode Island General Laws establish a library construction aid program. This section gives the Office of Library and Information Services authority to make grants-in-aid to a municipality or a free public library for the construction or capital improvement of any free public library designed to provide better services to the public. Since the program's inception in 1965, $\$ 44.8$ million has been committed to reimbursement of 89 public library construction projects in 33 communities in Rhode Island.

In general, library construction and renovation projects considered by the Office of Library and Information Services must meet certain criteria to be considered for a grant-in-aid. Firstly, the library must be eligible for state grant-in-aid as defined in Rhode Island General Law 29-6-3. Secondly, the project must improve public library services, meeting the needs of the community for at least the next 10 years. Thirdly, funds equal to or more than the state grant-in-aid must be appropriated for the same purpose by the city or town or dedicated to the same purpose from private sources. Projects meeting these criteria would then be ranked according to the priorities established by the Library Board of Rhode Island.

In FY 1999, the program was reactivated after an eight-year hiatus; the Library Board of Rhode Island revised its priorities for construction projects. Priority is assigned to projects based on the ability to pay, with the communities in the lowest quartile of "equalized weighted assessed valuation" ranked highest. Additionally, priority will be given to communities that have not completed a construction project involving state construction reimbursement funding.

As part of this process, the Library Board of Rhode Island established caps on construction reimbursement payments to a maximum of $\$ 5.0$ million per year by FY 2003, although the actual funding for any given year is subject to appropriation by the A ssembly. Additionally caps were established on allowable costs. These were set as $\$ 150$ per square foot for new construction and $\$ 125$ per square foot on renovation and remodeling. Cost per square foot is determined by the cost of contracts for new construction and or contracts for expansion, remodeling and alteration of existing buildings. It does not include other costs such as architect and consultant fees, site acquisition, initial equipment and furnishings, landscaping and parking lots, most of which are eligible for 50.0 percent reimbursement.

In 2005 at the request of the Rhode Island library community the Library Board, in consultation with the Office of Library and Information Services, undertook a study of the current costs of library construction in Rhode Island and the northeast to determine if the allowable costs per square foot should be increased to keep pace with the rising costs of construction. In early 2006, the Library Board approved an increase in allowable costs for construction. The new caps are set as $\$ 200$ per square foot for new
construction and $\$ 175$ per square foot on renovation and remodeling projects. This is an increase of $\$ 50$ per square foot for new construction and renovation projects compared to existing caps.

The state grant-in-aid is limited to a maximum of 50.0 percent of the total eligible costs as determined by the Office of Library and Information Services. The grants are paid on an installment basis for a period up to 20 years. The payments do not begin until the state fiscal year following the completion, acceptance, and audit of the project. Reimbursable costs also include any cost of borrowing the state share during the construction period. Examples of costs not eligible for state funds include the cost of fundraising by the municipality or the free library or the costs of temporary locations and moving library collections. In a case where the library is a component of local government, payments are made to the municipality. Payments for free public libraries are made directly to the libraries.

Library construction aid is considered indirect aid for two reasons. Firstly, payments are not necessarily made to a local government; some are made directly to free public libraries. Thus, funding cannot entirely be considered traditional local aid. Secondly, funds are targeted for specific use and are not for general support of the local government or free library budget. The state makes library construction aid payments to communities on a case by case basis based on the timing of each community's debt service payments.

Funding: Payment of the state grant-in-aid has been made from two sources of funds, federal grants and general revenues. When federal funds were made available in past fiscal years, attempts were made to use these funds for projects in which the federal funds would cover all or part of the total state share of the project. Payments from federal funds were made as lump sum payments upon completion of the project. These federal fund payments were not spread over a number of fiscal years as with the statefunded payments. In the case where the state share of the project was funded from both federal and state sources, the federal funds were expended in full in the first year of reimbursement. The remaining state funded portion would be paid in installments.

In September 1996, Congress passed the Library Services and Technology Act (LSTA). This act was a major revision of the federal program providing federal funds for public library services. Under the new federal program, no funds will be made available for construction reimbursement. Thus, any grants made in the future will be funded solely from general revenues.

In the early 1990 's, a policy was established not to fund any additional projects. Payments continued on existing grant agreements. This action was the result of the severe financial constraints on the state budget earlier in the decade. The impact of this policy is seen in the following graph as a reduction in annual payments for several years as projects were paid in full and no longer require an appropriation. Commitments for these ongoing payments would continue through FY 2014.

In A pril 1998, Governor Almond issued executive order 98-4, which reinstated the library construction aid program. At this time, the Library Board of Rhode Island began to revise its priorities for construction aid, setting limits in the level of reimbursement to be made by the state. The revised policies became effective in February 1999.

The Office of Library and Information Services undertook a Public Facilities Survey and Capital Budget F orecast in 1998. This survey became the document that provides an estimate of potential state commitments for construction grants in the out-years. The survey showed the potential for state grants of $\$ 40.0$ million based on planned capital improvement projects at libraries statewide. A number of these projects were eligible for reimbursements beginning in FY 2001, and the number of projects would continue to increase due to the reinstatement of the program.

The Public Facilities Survey was updated again in 2003 and is now updated periodically. The current estimated potential for state grants is $\$ 47.0$ million based on planned capital improvement projects at libraries statewide over the next ten years.

The state has maintained full funding of this program.
The 2011 Assembly provided $\$ 2.5$ million for FY 2011 and $\$ 2.8$ million for FY 2012 to fully fund library construction aid, as recommended by the Governor. The A ssembly also adopted legislation to impose a three-year moratorium on acceptance of applications for library construction aid projects through July 1, 2014.

Library Construction Aid (in millions)

# M unicipal Police Incentive Pay Program 

Statute: Rhode Island General Laws: Title 42, Chapter 28.1
Background: Section 42-28.1-1 of the Rhode Island General Laws establishes the Municipal Police Incentive Pay program. The purpose is to provide financial compensation to members of the state, city, and town police departments, sheriffs, deputy sheriffs and marshals, Rhode Island capitol police, park police and conservation officers of the Division of Enforcement in the Department of Environmental Management, and the state fire marshal and deputy fire marshals who have earned college credits in the field of police work.

For state employees, the incentive payment is made by the state agency for which the employee works and funds are included in each agency's budget. For municipal employees, payments are made by the state directly to the municipalities. Then, the municipalities make payments to the participants in the program. Since funds are targeted for specific use and are not for general support of the local government, funding for this program is considered indirect aid for the purposes of this report.

The amount of the incentive is based on a point system, which is related to the individual's level of educational attainment. The individual must be enrolled in a law enforcement degree program and take a minimum of nine credit courses per year and receive a degree within six years of receiving the first credit under the incentive program. The following table outlines the incentive requirements for this program.

| Incentive Step | Incentive Amount | Points Acquired |
| :---: | :---: | :--- |
| 1 | $\$ 1,000$ | 30 points |
| 2 | 2,000 | A ssociate's Degree in Law Enforcement |
| 3 | 3,000 | Bachelor's D egree in Law Enforcement or Criminal Justice |
| 4 | 3,500 | Juris Doctor, M aster's Degree in Law Enforcement (with Bachelor's |
|  |  | Degree in Law Enforcement, Criminal Justice, or Law) |

One point is awarded for each semester hour obtained from eligible institutions with concentrations in police and legal studies including classes in the field of behavioral sciences. Sixty points are awarded for attainment of an Associate's degree. One hundred twenty points are awarded for attainment of a Bachelor's degree.

The state fire marshals and deputy fire marshals can be granted incentive credits for a degree with a concentration in fire science, instead of law enforcement or criminal justice. The state makes these payments to communities in December of each year.

Significant Legislative Amendments: Section 42-28.1-7 of the Rhode Island General Laws requires that the General Assembly annually appropriate the funds it deems necessary for this incentive pay program. Section 42-28.1-6(a) allows for the ratable reduction in incentive payments if annual appropriations are not sufficient to fully fund the program. This section was amended in 1983 to include the ratable reduction
provision, which was first used in FY 1992 when the level of incentive totaled only 64.0 percent of the eligible amounts. Prior to FY 1992, the program was fully funded.

The 1993 A ssembly enacted that individuals not receive less than 25.0 percent of the individual's full incentive. However, the 1995 A ssembly repealed this requirement. Payments have not exceeded 20.0 percent since FY 1995.

Over time, eligible participants in the program have changed. In 1987, the state fire marshal and deputy fire marshals in the Rhode Island Division of Fire Safety were added to the program. In 1997, the Division of Drug Control of the Department of Health was abolished. The employees of this division were previously eligible for incentives under this program.

Funding: The M unicipal Police Incentive Pay program was fully funded in FY 1990 and FY 1991 with appropriations of $\$ 2,737,684$ and $\$ 2,832,936$, respectively. By FY 1996, funding had been reduced to approximately $\$ 500,000$, where it remained through FY 1998. In FY 1999, the General Assembly appropriated an additional $\$ 50,000$, or ten percent, increasing funding to $\$ 550,000$. Additional ten percent annual increases brought funding $\$ 732,050$ in FY 2003. It remained at that level for FY 2004, FY 2005, and FY 2006.

The Governor recommended Article 9 of 2006-H 7120 to eliminate the incentive program effective for FY 2007. It currently serves 1,138 policemen and would cost $\$ 0.7$ million in FY 2007 under current law. The Assembly did not concur and it restored the program with $\$ 450,000$ for payments to police officers.

The Assembly provided \$450,000 for FY 2008, which is the same as the FY 2007 enacted budget, and the Governor's recommendation.

This Governor recommended Article 13 of 2008-H 7390 to repeal this program effective for FY 2009, and removed the enacted funding of $\$ 450,000$. The 2008 A ssembly did not concur and maintained this program in the general laws; however, provided no funding. No funding has been provided since.

## M unicipal Police Incentive Pay Program

 (in millions)

# M unicipal Firefighters Incentive Pay Program 

Statute: Rhode Island General Laws: Title 42, Chapter 28.4
Background: Section 42-28.4-1 of the Rhode Island General Laws established a Municipal Firefighters Incentive Pay Program. The purpose of this program is to provide financial compensation to members of the municipal fire departments and fire districts, the Cumberland rescue department and emergency service technicians of the Town of Lincoln who have furthered their education at the college level. Payments are made by the state directly to the municipalities, which, in turn, make payments to the participants in the program. Since funds are targeted for specific use and are not for general support of the local government, funding for this program is considered indirect aid for the purposes of this report.

The amount of the incentive is based on a point system, which is related to the individual's level of educational attainment. The individual must be enrolled in a program with a concentration in fire science and take a minimum of nine semester hours per year. The following table outlines the incentive requirements for this program.

| Incentive Step | Incentive A mount | Points Acquired |
| :---: | :---: | :--- |
| 1 | $\$ 1,000$ | 30 points |
| 2 | 2,000 | A ssociate's D egree |
| 3 | 3,000 | Bachelor's Degree |

One point is awarded for each semester hour obtained from eligible institutions with concentrations in police and legal studies including classes in the field of behavioral sciences. Seventy points are awarded for attainment of an A ssociate's degree. One hundred forty points are awarded for attainment of a Bachelor's degree. The state makes these payments to communities in December of each year.

Significant Legislative Amendments: Section 42-28.4-6 of the Rhode Island General Laws requires that the General Assembly annually appropriate the funds it deems necessary for this incentive pay program. Section 42-28.4-5(a) allows for the ratable reduction in incentive payments if annual appropriations are not sufficient to fully fund the program. This section was amended in 1983 to include the ratable reduction provision, which was first used in FY 1992 when the level of incentive totaled only 64.0 percent of the eligible amounts. Prior to FY 1992, the program was fully funded.

The 1993 Assembly enacted that individuals not receive less than 25.0 percent of the individual's full incentive. However, the 1995 A ssembly repealed this requirement. Payments have not exceeded 20.0 percent since $F Y 1995$.

Eligibility for the program has remained constant with the exception of one amendment. In 1985, members of the Cumberland rescue department and emergency service technicians in the Town of Lincoln were made eligible for the incentive pay program.

Funding: The M unicipal Firefighters Incentive Pay program was fully funded in FY 1990 and FY 1991 with appropriations of $\$ 1,378,018$ and $\$ 1,388,000$, respectively. Funding for the program was reduced to approximately $\$ 272,000$ by FY 1996 and to $\$ 250,000$ in FY 1997. In FY 1999, the General Assembly appropriated an additional $\$ 25,000$, or ten percent, increasing funding to $\$ 275,000$. Additional ten percent annual increases brought funding $\$ 366,025$ in FY 2003. It remained at that level for FY 2004, FY 2005, and FY 2006.

The Governor recommended Article 9 of 2006-H 7120 to eliminate the incentive program effective for FY 2007. It currently serves 478 firemen and would cost $\$ 0.4$ million in FY 2007 under current law. The A ssembly did not concur and restored the program with $\$ 225,000$ for payments to firefighters.

The Assembly provided $\$ 225,000$ for FY 2008, which is the same as the FY 2007 enacted budget, and the Governor's recommendation.

This Governor recommended Article 13 of 2008-H 7390 to repeal this program effective for FY 2009, and removed the enacted funding of $\$ 225,000$. The 2008 Assembly did not concur and maintained this program in the general laws; however, provided no funding. No funding has been provided since.

## Municipal Firefighters Incentive Pay Program (in millions)

## Public Service Corporation Tax

Statute: Rhode Island General Laws: Section 44-13-13
Background: The tangible personal property of telegraph, cable, and telecommunications corporations and express corporations used exclusively in conducting business for the corporation is exempt from local taxation, but is subject to taxation by the state. Tangible personal property includes lines, cables, ducts, pipes, machines and machinery, and equipment.

By $M$ arch $1^{\text {st }}$ of each year, companies are required to declare the value of their tangible personal property to the Division of Taxation. The Division of Taxation uses this data to calculate the taxes due from each company. The calculation is based on the average assessment ratios in the state and the average property tax rate. Funds are collected by the Division and distributed as prescribed in statute.

The statute allows for the use of up to 0.75 percent for administrative expenses. These funds are deposited as general revenues. The remaining funds are distributed to the municipalities on the basis of the ratio of the population of the municipality to the population of the state as a whole. For distribution purposes, population data from the most recent census is used. These payments are made by the state in July of each year.

Significant Legislative Amendments: The 1985 A ssembly amended Chapter 44-13 to change references to "telephone" corporations to "telecommunications" corporations, and to replace the word "utility" with "corporation" throughout the chapter.

The 1990 A ssembly altered the timing of payments to certain municipalities. The law previously provided for payments to be made to municipalities no later than July 30 for any city or town with a fiscal year end of June 30. Payments were to be made no later than the last month of the municipality's fiscal year end for any city or town with a fiscal year end other than June 30. The amendment provided that payment would be made to all cities and towns by July 30 .

In his FY 2003 budget recommendations, Governor Almond recommended a change to the public service corporation tax that would provide local governments with $\$ 6.7$ million of additional property taxes by changing the method of levying this tax on the property of telecommunications companies. It would have changed the method of assessing the tax from the average assessment ratios in the state and the average property tax rate to one using a weighted average tax rate determined as the sum of each community's tax rate multiplied by its percent of total population. The A ssembly did not concur.

Governor Carcieri included Article 6 in his FY 2006 revised budget that would freeze the statewide tax rate applied to tangible personal property of public service corporations at last year's rate. Collections from this tax have declined from $\$ 18.0$
million in FY 2003 to an estimated amount of $\$ 12.2$ million in the Governor's FY 2007 recommended budget.

Part of this is attributed to a decline in the value after depreciation of the assets. The value of these assets had grown rapidly in 2000 with investment in fiber optics and associated equipment, but values have now declined later in the decade. The other reason for the decline is more frequent tax revaluations, which lowers the average statewide property tax rate that is used in the calculation of the tax. The A ssembly did not concur.

The Governor proposed legislation in his FY 2009 revised budget to freeze the tax rate applied to the tangible personal property of public service corporations at the FY 2008 rates. Freezing the rate at the FY 2008 level is estimated to prevent the loss of revenues to the municipalities of $\$ 645,000$. The A ssembly concurred with the freeze.

Funding: Taxes are due from the corporations in June of each fiscal year. Payments are made in July from receipts collected in June. Funds for this program are not included in the annual appropriations act. The FY 2012 budget assumes the state will collect $\$ 11.8$ million of property taxes from public service corporations on behalf of municipalities and pass that back to them.

## Public Service Corporation Tax

 (in millions)

## Property Tax Issues

Rhode Island property taxes comprise 53.2 percent of all local revenues; nationally they comprise only 27.9 percent. The Rhode Island percentage is the second highest in the United States, partially due to the fact that Rhode Island local governments are not allowed to levy local option general sales or income-based taxes.

Rhode Island provides for taxation of real and personal property and motor vehicles as the principal source of local government financing. The taxes are assessed and levied locally with exception of the property tax on public service corporations. That tax is levied at the state level with the funds distributed back to local governments.

State and/or local property taxes are levied in all 50 states. Rhode Island ranks very high in the percentage of state and local revenues generated from property taxes. It has traditionally relied more on local property taxes than most states. FY 2006 census data showed that it ranks fifth in state and local property taxes per $\$ 1,000$ of personal income and third in state and local property taxes per capita.

The high R hode Island rank is partially due to the fact that, until recently, R hode Island local governments had no local option sales or income-based taxes. Recent actions by the General Assembly have provided local meals and beverage and transient guest tax revenues to the cities and towns where the transactions occur. However, these total approximately only one percent of the total of local property tax revenues.

Beginning in the late 1990s, there were concerted efforts by the General A ssembly to decrease reliance on the property tax as a source of state and local expenditures through increased reliance on the property tax as a source of state and local expenditures through increased general revenue sharing percentages, motor vehicle excise tax phaseout payments, and dedication of certain video lottery terminal proceeds.

As noted earlier, the 2003 A ssembly provided for a 1.0 percent meals and beverage tax to be remitted back to the communities in which it is collected, effective August 1, 2003. The 2004 Assembly provided a local 1.0 percent transient guest tax to be remitted back to the communities in which it is collected, effective January 1, 2005.

## Recent Legislation

Property Tax Cap. The 2006 A ssembly enacted legislation to cap the property tax levy at 5.25 percent over the prior year, dropping annually by 0.25 percent to 4.0 percent by FY 2013. Prior to the legislation, communities would increase property taxes up to 5.5 percent, and could apply that limit to either the rate that taxpayers pay or the overall tax levy. The property tax relief act applies the tax cap strictly to the levy. The legislation provides for safeguards to enable communities to exceed the cap in emergencies.

| Fiscal <br> Year | Percentage <br> Levy |
| :---: | :---: |
| 2008 | $5.25 \%$ |
| 2009 | $5.00 \%$ |
| 2010 | $4.75 \%$ |
| 2011 | $4.50 \%$ |
| 2012 | $4.25 \%$ |
| 2013 | $4.00 \%$ |

Administrative Procedures. The 2008 A ssembly amended the administrative procedures statute to allow municipal governments to substitute the notice printed in newspapers with a posting on a website that may be maintained by the Secretary of State.

Municipal Finances. The 2008 Assembly created the Advisory Council on Municipal Finances to make recommendations on a uniform system of accounting for all municipalities. The enacted legislation requires that the Advisory Council on M unicipal Finances take into consideration the work of the Advisory Council on School Finances, which was created by the 2004 A ssembly.

Health Insurance Collective Bargaining. The 2008 Assembly enacted legislation effective August 1, 2008 to prohibit the state and municipalities from specifying that an employer must procure a health care benefit plan from a specific provider in collective bargaining contracts. Additionally, specifications for the health care benefit plan cannot be constructed to identify an exclusive provider for the benefits.

Fiscal Impact Statements. The 2008 A ssembly enacted legislation to require that school committees and city and town councils prepare fiscal impact statements of all collective bargaining contracts for the term of the contracts. Additionally, the fiscal impact statement and the awarded contract must be publicized and be made immediately available upon ratification.

Municipal Reporting. The 2011 Assembly enacted legislation requiring all municipalities to provide the Division of Municipal Finance a five-year forecast including options for funding annually required post employment benefit liabilities, certified tax rolls no later than the next succeeding A ugust 15 , fiscal impact statements for changes in health care plans and to notify the auditor general and the Division
within 30 days after the end of the fiscal year if it is likely to incur a deficit. The legislation also requires local school districts to submit corrective action plans to the Division within five days of discovery of potential or actual over expenditure or revenue deficiency in addition to the current practice of submitting them to the city or town council president.

Retiree Health. The 2011 A ssembly enacted legislation that allows municipalities to require its retirees to enroll in M edicare upon eligibility as a condition of receiving or continuing to receive retirement and other post employment benefits.

## Appendix VI

Distressed Communities Relief Calculation Data FY 2012

## Distressed Communities Relief Program

Distressed Communities Relief Program payments are made to communities falling in the lowest 20.0 percent for at least three of the four indices used to determine eligibility. The indices are (1) percent of tax levy to full value of property, (2) per capita income, (3) percent of personal income to full value of property, and (4) per capita full value of property. Twenty percent of the 39 cities and towns equals eight. The community rankings for FY 2012 are shown in the table on the next page. This is followed by explanations of each of the indices along with tables showing the communities' indices values and rankings.

The indices are explained below with the data presented for each community, followed by a summary of the ranking and the actual distribution to eligible communities. Each of the four indices are shown separately with the calculations and the community rankings to determine eligibility. Then a summary sheet is shown detailing the summarized rankings for the communities for all four indices. The final page of the appendix shows the qualifying communities and the distressed community relief fund payments awarded to each. The following paragraphs explain how the indices are cal culated.

Index 1: Percent of Tax Levy to Full Value of Property. The percent levy to full value of property index is computed by dividing the tax levy of each municipality by the full value of property for each municipality based on the most recent available information collected by the Division of M unicipal Finance.
A. The full value of property is shown in column $\mathbf{A}$.
B. M unicipal tax levies are shown in column B.
C. Tax levy as a percent of full value is shown in column C.
D. Community rankings on tax levy as a percent of full value is shown in column $\mathbf{D}$. Coventry, Cranston, Glocester, Johnston, North Providence, Providence, West Warwick, and W oonsocket have the eight highest percentage rankings on this index.

Index 2: Per Capita Income. The communities are ranked on per capita income reported by the United States Department of Commerce Bureau of the Census. Per capita income for 2009 is shown in the first column of the table. The eight communities with the lowest per capita income are Burrillville, Central Falls, East Providence, Johnston, Pawtucket, Providence, W est W arwick, and W oonsocket.

| W oonsocket |  | 20,846 | 3 |

Index 3: Percent of Personal Income to Full Value of Property. The facing page shows the calculations.
A. Column A shows the most recent population estimate as reported by the United States Department of Commerce, Bureau of the Census.
B. Population in column $\mathbf{A}$ is then multiplied times per capita income from the previous table to calculate the personal income for each community shown in column B.
C. Full value of property is shown in column C. This is the data from index 1 .
D. The percent of personal income to full value of property shown in column $\mathbf{D}$ is computed by dividing the personal income in column B by the full value in column $\mathbf{C}$.
E. Column E shows the community rankings. Central Falls, Coventry, Cumberland, Glocester, North Providence, Pawtucket, W est W arwick and W oonsocket fall in the top eight rankings.

## FY 2012 Distressed Communities Aid C alculations

Index 4: Per Capita Full Value of Property. The next page shows the calculations for the final index, the per capita full value of property. This calculation is based on dividing the full value of property by population, and ranking the communities as shown in columns $\mathbf{C}$ and $\mathbf{D}$. Columns $\mathbf{A}$ and $\mathbf{B}$ contain values previously discussed and used in the other indices.

Burrillville, Central Falls, East Providence, N orth Providence, Pawtucket, Providence, W est W arwick and W oonsocket fall within the top eight on this criterion.

Eligible Communities. The final tables show the use of the rankings and the data to make the distributions to the qualifying communities. The table on the facing page presents a summary of the rankings. Thirteen communities qualified on at least one index, but only six qualified on at least three: Central Falls, North Providence, Pawtucket, Providence, West Warwick and Woonsocket qualify for distressed community funding for FY 2012 by obtaining a ranking of one through eight in at least three of the four above mentioned indices. For FY 2007, Burrillville qualified as a new community. For FY 2011, East Providence qualified for distressed aid and North Providence is disqualified. For FY 2012, Burrillville and East Providence disqualified and $N$ orth Providence qualified for distressed aid.

Distributions. The funds are normally distributed on the basis of each qualifying community's tax levy as a percent of the sum of the tax levies for all the qualifying distressed communities as shown on the facing table.

The 2005 Assembly passed Article 11 of 2005-H 5270, Substitute A to allow communities to qualify as distressed if they fall into the lowest 20.0 percent for at least three of the four indices used to determine eligibility, or the eight lowest ranked communities. For FY 2006, this allowed North Providence as a new entrant into the program. The law allows for the new qualifying community to receive 50.0 percent of its payment for the first year, then full funding thereafter. The remaining 50.0 percent would be distributed to the other distressed communities to lessen the effect of the loss of funds due to a new entrant. When a community falls out of the distressed community program, it would receive a one-time transition payment of 50.0 percent of the eligible prior year payment.

For FY 2006 and FY 2007 program funding included $\$ 5.0$ million from state general revenue appropriation and $\$ 0.30$ of the $\$ 2.00$ real estate conveyance tax fee charged for each five hundred dollars or fractional part paid for the purchase of property per Rhode Island General Law 45-25-1. The 2007 A ssembly converted the real estate conveyance portion to general revenues and made the program subject to appropriation.

The 2007 A ssembly concurred with the Governor's proposal to freeze communities' FY 2008 aid payments at the FY 2007 level by using older reference data, and fix future amounts at 3.0 percent of tax revenues, ending the phase-up.

The 2005 Assembly enacted Rhode Island General Law 42-61.2-7 that requires 12.5 percent of the state's share of the new video lottery machine revenue up to a maximum of $\$ 20.0$ million be equally allocated to the distressed communities providing that no community receives more than 25.0 percent of that community's currently enacted municipal budget. The 2006 A ssembly converted that dedication to 0.19 percent of all net terminal income up to $\$ 20.0$ million per year be dedicated to the program. The conversion was neutral, that is, the same amounts were achieved, which for FY 2007 is $\$ 975,000$. The 2007 Assembly provided $\$ 784,458$ for FY 2008 and the 2008 Assembly froze the distribution of state share of video lottery terminal revenue at the FY 2008 enacted level of $\$ 784,458$.

The 2009 A ssembly provided $\$ 10.4$ million from general revenues to fund the program It also enacted legislation to subject the video lottery terminal funding to appropriation and clarified how much of the appropriation will be distributed equally to each qualifying distressed community.

The 2011 A ssembly concurred with the Governor's recommendation to provide $\$ 10.4$ million to fund the program. It also adopted legislation to clarify how much of the appropriation will be distributed equally to each qualifying distressed community.
A. This column lists the tax levies of the qualifying communities.
B. This column calculates the percent to the total for each community.
C. This column calculates each community's payment based on the percentage in column B for all qualifying communities.
D. This column shows the weights for payments as previously mentioned. When a new community qualifies, it receives 50.0 percent of payment under the new statutory qualifications.
E. Column E on the next page lists the current law weighted payment, which would allow a new community to only receive 50.0 percent of its payment.
F. Column $\mathbf{F}$ on the next page would then distribute the remaining 50.0 percent of what would have been paid to the newly qualifying community to the other communities proportionately to lessen the effect of the loss of funds due to the new entrant.
G. Column $\mathbf{G}$ in the table distributes the video lottery machine revenues equally to the qualifying communities as required by Rhode Island General Law 42-61.2-7.
H. Column $\mathbf{H}$ in the table summarizes each community's total payment by adding columns E, F and $\mathbf{G}$.

## Appendix VII

Payment in Lieu of Taxes Calculation Data FY 2012

## Payment in Lieu of Taxes Program

The Payment in Lieu of Taxes Program reimburses cities and towns for property taxes, which would have been due on real property owned by nonprofit educational institutions, nonprofit hospitals, or any state-owned hospital, veterans' residential facility or correctional facility, which is exempt from taxation by state law.

The calculation for payment is based on 27.0 percent of the taxes that would have been collected if the property had been taxable. The following steps are used to determine the appropriate amounts for the eligible cities and towns:
A. City and town tax assessors report the value of qualifying properties to the Office of M unicipal Affairs, which in turn computes the tax dollars that would have been collected for these properties. These tax dollars are shown in the column A in the table on the next page. The FY 2012 payment was based on property assessed as of December 31, 2009.
B. The Property Valuation Office, formerly the Office of M unicipal Affairs, then calculates 27.0 percent of the taxes that would have been collected by each municipality and the state pays each community that amount in lieu of taxes collected. If the total amount of the appropriation is less than the amount necessary to reimburse communities at 27.0 percent, the statute allows for reimbursements to be ratably reduced.
C. The A ssembly provided $\$ 33.1$ million in FY 2012. The total provided represents a reimbursement of 23.4 percent, which is 4.0 percent and $\$ 5.5$ million more than the Governor recommended. Distributions to communities reflect updated data and a ratable reduction to the appropriation.

The payments are made in July of each year and are shown in column $\mathbf{C}$ on the following page.

This column shows the proportional reduction of payment to the appropriate level. The appropriation was 78.1 percent of the total entitlement so each community received 78.1 percent of its full entitlement.

## Appendix VIII <br> General Revenue Sharing C alculation Data FY 2009

## General Revenue Sharing

Rhode Island General Law 45-13-1, entitled apportionment of annual appropriation for state aid, details the distribution of the general revenue sharing program funds as follows.

Section 45-13-1 (b), aid to cities and towns shall be apportioned as follows: For each county, city or town, let R be the tax effort divided by the square of per capita income, $R=$ tax effort/(income $x$ income).

The amount to be allocated to the counties shall be apportioned in the ratio of the value of $R$ for each county divided by the sum of the values of $R$ for all five (5) counties.

The amount to be allocated to the all cities and towns within a county shall be the allocation for that county apportioned proportionately to the total tax effort of the towns and cities in that county.

The amount to be allocated to any city or town is the amount allocated to all cities or all towns within the county apportioned in the ratio of the value of R for that city or town divided by the sum of the values of R for all cities or towns in that county; provided, further, that no city or town shall receive an entitlement in excess of 145 percent of that city or town's population multiplied by the average per capita statewide amount of the annual appropriation for state aid to cities and towns. A ny excess entitlement shall be allocated to the remainder of the cities and towns in the respective county in accordance with the provisions of this section.

The statewide appropriation for the general revenue sharing program is annually based on 3.0 percent of total state tax revenues collected from the second prior fiscal year as set by schedule in Rhode Island General Law 45-13-1, subject to appropriation. Once the calculation is made statute requires that 0.10 percent of the state's share all net video lottery terminal income up to a maximum of $\$ 10.0$ million be allocated to nondistressed communities based on the proportion of the general revenue sharing distribution for that year.

The FY 2012 enacted budget does not include any funding for the program.
Step One-Calculation of Tax Effort. The first two tables detail the calculation for each community's tax effort that is used in the general revenue sharing formula.

Tax effort is defined in Rhode Island General Law 45-13-1 as the total taxes imposed by a city or town for public purposes or the totals of those taxes for the cities and towns within a county (except employee and employer assessments and contributions to finance retirement and social insurance systems and other special assessments for capital outlay) determined by the United States Secretary of Commerce for general statistical purposes and adjusted to exclude amounts properly allocated to education expenses.
A. Lists actual property taxes collected by the communities as annually reported to the Office of Property V aluation. The data used for the FY 2009 calculation is the same data as used for FY 2008. The 2009 Assembly adopted the Governor's recommendation to subject the program permanently to appropriation.
B. Lists actual license and permit fees collected for general operating purposes by the various communities from audited financial statements of the various communities.
C. Lists the communities' local taxes that are spent for general educational purposes.
D. Lists costs that are incurred for debt related to schools in the various communities.

FY 2009 C alculation of Tax Effort

|  | A | B <br> Licenses and <br> Permits | Local <br> E ducation to | C ducation Debt <br> Costs |
| :--- | ---: | ---: | ---: | ---: | ---: |
| City or Town | Property Taxes |  |  |  |

Step One-Calculation of Tax Effort-Continued. The next table continues the tax effort cal culation.
A. Lists community expenditures supported by school housing aid.
B. Summarizes total education aid allowable for the tax effort calculation. It includes Local Taxes to Education, column C from the previous table plus Education Debt Costs, column D from the previous table, minus School Housing, column A from this table.
C. The final column is the actual calculation for tax effort to be included in the general revenue sharing formula. It includes Property Taxes, column A from the previous table, plus License and Permits column B from the previous table, minus total education aid that was calculated in column B of the current table. This final number is the amount of tax effort for each community that is used in the general revenue sharing formula.

| W est W arwick |  | 1,369,414 |  | 22,630,441 |  | 16,591,678 |
| W oonsocket |  | 1,772,669 |  | 10,796,793 |  | 27,659,330 |
| Total | \$ | 34,594,114 | \$ | 939,388,885 | \$ | 701,563,090 |

Step Two-Calculation of Per Capita Income. The next table details the calculation of per capita income, which is defined in Rhode Island General Law 45-13-1 as the most recent estimate of per-capita income for each city and town as reported by the most recent census report as provided by the United States Department of Commerce, Bureau of the Census.

The 2003 A ssembly enacted Article 16 of 2003-H 6174 Substitute A to use a blended rate of 90 percent of the per capita income data from the 1990 census and 10 percent of the per capita income from the 2000 census. This was done to lessen the impact of the 2000 census on the communities in FY 2004. In each of the nine succeeding fiscal years after 2004, the calculation shall be based on a blended rate that increases the percentage of data from the 2000 census by ten percent from the previous year and decreases the percentage of the data utilized from the 1990 census by ten percent from the previous year.
A. Lists the per capita income for each community as reported by the Bureau of the Census in the 1990 census.
B. Lists the per capita income for each community as reported by the Bureau of the Census in the 2000 census.
C. Calculates 60.0 percent of the 1990 per capita income by multiplying column A by 60 percent to arrive at the listed figures for each community.
D. Calculates 40.0 percent of the 2000 per capita income by multiplying column B by 40 percent to arrive at the listed figures for each community.
E. Column $\mathbf{E}$ is the final amount to be used for per capita income for the general revenue sharing program formula. It adds column $\mathbf{C}$ and column $\mathbf{D}$ to arrive at the blended rate of 60.0 percent of the 1990 per capita income and 40.0 percent of the 2000 per capita income.

| W est W arwick | 14,461 | 20,250 | 8,677 | 8,100 | 16,777 |
| W oonsocket | 11,997 | 16,223 | 7,198 | 6,489 | 13,687 |
| Total | 14,981 | 21,688 | 8,989 | 8,675 | 17,664 |

Step Three-Calculation of R. R is defined in Rhode Island General Law 45-13-1 as each county, cities and towns tax effort divided by the square of per capita income as reported by the United States Department of Commerce, Bureau of the Census, using the blended rate previously discussed. The value of $R$ is used in several component pieces of the general revenue sharing formula.
A. Column A lists each community's tax effort for the general revenue sharing formula that was previously calculated in step one.
B. Column B lists each community's per capita income squared, which is part of the calculation of $R$.
C. Column C calculates the percentage value of R for each community that is used is several component parts of the general revenue sharing formula. It is the result of dividing column $\mathbf{A}$ by column $\mathbf{B}$ for each community.

## FY 2009 Calculation of $R$

Step Four-C alculation of Maximum Entitlement. The maximum entitlement award for each community according to Rhode Island General Law 45-13-1(b) is set at 145 percent of each community's population multiplied by the average per capita statewide amount of the annual appropriation for state aid to cities and towns.

A ny excess entitlement shall be allocated to the remainder of the cities and towns in the respective county by distributing the excess proportionately to the remaining cities and towns that do not exceed the maximum entitlement through the same formula.
A. The first step in calculating the maximum entitlement award is to list the population for all communities as reported by the Bureau of the Census in the 2000 census. These population figures are shown in column $\mathbf{A}$.
B. Column B shows the statewide appropriation of $\$ 54.7$ million for the FY 2009 general revenue sharing program as the total at the bottom of column B.
C. Column C calculates the per capita statewide appropriation amount to be used in the calculation to determine each community's maximum entitlement. The amount is arrived at by dividing the statewide appropriation of $\$ 54.7$ million by the total state population of $1,048,319$. The result is then multiplied by 145 percent and results in the $\$ 75.66$ per capita average that is shown for each community.
D. The final column $\mathbf{D}$ shows each community's maximum entitlement amount. It is calculated by multiplying each community's population in column A by the per capita statewide appropriation amount of $\$ 75.66$ as shown in column $\mathbf{C}$.

## FY 2009 Calculation of Entitlement Limits

| City or Town | A Population | B Total Appropriation |  | C <br> Per Capita <br> Statewide |  | D <br> Maximum <br> Entitlement |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

County Allocations. The general revenue sharing formula begins by calculating the amount to be awarded to the five counties: Bristol, Kent, Newport, Washington and Providence.
A. The calculation begins by listing each county's tax effort as reported by the communities within each county.
B. The next column B lists each community's per capita income squared and it totals the five counties for the statewide total of per capita income squared. This calculation is based on 60.0 percent of the 1990 census data for per capita income and 40.0 percent of the 2000 census data per Rhode Island General Law 45-13-1, as previously discussed.
C. Column C calculates the value of each county's $R$, which is defined as each county's tax effort shown in column $\mathbf{A}$, divided by per capita income squared as shown in column B.
D. Column D calculates the percentage of R for each county, by dividing the amount shown in column $\mathbf{C}$ for each county, by the total for all five counties as shown in the total amount at the bottom of column $\mathbf{D}$.
E. Column E calculates the dollars awarded to each county. It is the percent of $R$ as shown in column $\mathbf{D}$ for each county multiplied by the total state appropriation for the general revenue sharing program of $\$ 54.7$ million as shown in the total of column $\mathbf{E}$.
F. The Assembly provided $\$ 25.0$ million to fund the program in FY 2009 to be distributed proportionally on the same basis as the original enactment, which included $\$ 412,873$ from the dedicated 0.10 percent of all net video lottery terminal income to non-distressed communities based on the proportion of the general revenue sharing distribution for that year.

## FY 2009 G eneral Revenue Sharing - Five C ounties

| Counties | A Tax Effort | B <br> Per Capita Income Sq. | C | D Percent | Allocation | F <br> FY 2009 <br> Ratable Red. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Bristol | \$ 28,481,563 | 455,352,921 | 0.063 | 2.7\% | \$ 1,450,951 | \$ | 667,769 |
| Kent | 105,051,649 | 375,080,689 | 0.280 | 11.9\% | 6,497,035 |  | 2,981,887 |
| Newport | 68,233,762 | 432,764,809 | 0.158 | 6.7\% | 3,657,501 |  | 1,683,284 |

| Providence | 435,362,645 | 256,800,625 | 1.695 | 71.9\% | 39,327,118 |  | 17,933,658 |
| Total | \$701,563,090 | \$ 1,916,845,285 | 2.358 | 100.0\% | \$54,699,003 | \$ | 25,000,000 |

Providence County Calculations. The general revenue sharing calculation for Providence County is divided into two calculations, one for the six cities in the county and one for the ten towns in the county. These separate calculations for cities and towns are apportioned proportionally to the total tax effort of the cities and towns in the county based on Rhode Island General Law 45-13-1 (4) (b).

Each community's award is then reviewed to determine if any of the awards exceed the maximum entitlement allocation, if so the excess is distributed to the remaining communities within the county. The excess entitlement funds are distributed proportionately to the remaining communities that do not exceed the maximum entitlement through the same formula.

## City Calculation

A. Tax Effort. The calculation for cities within Providence County begins with the listing of each community's tax effort as reported by the cities and this is shown in column A of the table on the next page. The column lists each individual city's tax effort as reported and it shows the total for the cities' tax effort within Providence County.
B. Calculate Per Capita Income Squared. Column B of the table on the next page lists each community's calculated amount for per capita income squared and it totals the per capita income squared for the cities within Providence County. This calculation is based on 60.0 percent of the 1990 census data for per capita income and 40.0 percent of the 2000 census data for per capita income, per Rhode Island General Law 45-13-1.
C. Calculate "R". Column C calculates the value of R, which is defined in Rhode Island General Law 45-13-1 as each city's tax effort, divided by per capita income squared for each City. The result is shown in column $\mathbf{C}$ of the table on the next page and is arrived at by dividing column $\mathbf{A}$ by column B.
D. Calculate Percentage of "R". Column $\mathbf{D}$ then calculates the percentage of $R$ for each individual city compared to the total $R$ for the cities in Providence County. The calculation divides each community's R -value in column $\mathbf{C}$ by the total of the Providence County $R$ value shown as the total of column $\mathbf{C}$.
E. City Allocation. Column $\mathbf{E}$ then calculates the first allocation of the actual award to be made to each city. This is based on the total of all the cities tax effort divided by the tax effort of the county multiplied by the percentage of each city's "R" calculated in D multiplied by the total general revenue sharing appropriation of $\$ 39.3$ million allotted to Providence County that was previously calculated in the five counties allocation. This is the first calculation for each city's award.

## Providence County

| Cities | A Tax Effort | B <br> Per Capita Income Sq. | R | D ${ }_{\text {Percent R }}$ |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Central Falls | \$ 9,494,334 | \$ 93,973,636 | 0.101 | 6.2\% | \$ | 1,849,203 |
| Cranston | 68,120,440 | 336,502,336 | 0.202 | 12.4\% |  | 3,705,234 |
| Pawtucket | 43,601,212 | 210,888,484 | 0.207 | 12.6\% |  | 3,784,181 |
| Providence | 156,059,828 | 177,235,969 | 0.881 | 53.7\% |  | 16,116,305 |
| W oonsocket | 27,659,330 | 187,333,969 | 0.148 | 9.0\% |  | 2,702,411 |
| E ast Providence | 27,035,842 | 270,372,249 | 0.100 | 6.1\% |  | 1,830,223 |
| Total | \$ 331,970,986 | \$1,276,306,643 | 1.638 | 100.0\% | \$ | 29,987,557 |

## Town Calculation

The same calculation is then performed for the ten towns in Providence County, which is shown on the next page.
A. Tax Effort. The calculation for towns within Providence County begins with the listing of each community's tax effort as reported by the towns and this is shown in column A of the table on the next page. The column lists each individual town's tax effort as reported and it shows the total for the towns' tax effort within Providence County.
B. Calculate Per Capita Income Squared. Column B of the table on the next page lists each community's calculated amount for per capita income squared and it totals the per capita income squared for towns within Providence County. This calculation is based on 60.0 percent of the 1990 census data for per capita income and 40.0 percent of the 2000 census data for per capita income, per Rhode Island General Law 45-13-1.
C. Calculate " $\mathbf{R}$ ". Column $\mathbf{C}$ calculates the value of $R$, which is defined in Rhode Island General Law 45-13-1 as each town's tax effort, divided by per capita income squared for each town. The result is shown in column $\mathbf{C}$ of the table on the next page and is arrived at by dividing column $\mathbf{A}$ by column B.
D. Calculate Percentage of "R". Column D then calculates the percentage of $R$ for each individual town compared to the total $R$ for the towns in Providence County. The calculation divides each community's R -value in column $\mathbf{C}$ by the total of the Providence County $R$ value shown as the total of column $\mathbf{C}$.
E. Allocation. Column $\mathbf{E}$ then calculates the first allocation of the actual award to be made to each town. This is based on the total of all the towns tax effort divided by the tax effort of the county multiplied by the percentage of each town's "R" calculated in $\mathbf{D}$ multiplied by the total general revenue sharing appropriation of $\$ 39.3$ million allotted to Providence County that was previously calculated in the five counties allocation. This is the first calculation for each town's award.

## Providence County

| Towns | A Tax Effort | $\bar{B}$ <br> Per Capita Income Sq. | C R | D Percent R |  | E First Allocation |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Burrillville | \$ 4,180,516 | \$ 269,222,464 | 0.016 | 5.4\% | \$ | 501,619 |
| Cumberland | 14,288,996 | 421,727,296 | 0.034 | 11.7\% |  | 1,094,524 |
| F oster | 2,260,551 | 335,439, 225 | 0.007 | 2.3\% |  | 217,699 |
| Glocester | 4,007,758 | $325,225,156$ | 0.012 | 4.3\% |  | 398,082 |
| Johnston | 23,238,038 | 293,951,025 | 0.079 | 27.3\% |  | 2,553,759 |
| Lincoln | 10,018,438 | 480,881,041 | 0.021 | 7.2\% |  | 673,004 |
| North Providence | 19,847,207 | 375,468, 129 | 0.053 | 18.3\% |  | 1,707,583 |
| N orth Smithfield | 5,582,621 | 391,683,681 | 0.014 | 4.9\% |  | 460,424 |
| Scituate | 4,879,005 | 496,264,729 | 0.010 | 3.4\% |  | 317,595 |
| Smithfield | 15,088,529 | 344,399, 364 | 0.044 | 15.2\% |  | 1,415,272 |
| Total | \$ 103,391,659 | \$3,734,262,110 | 0.289 | 100.0\% | \$ | 9,339,561 |

## M aximum Entitlement Allocation

A fter the first allocation is calculated for the cities and towns in Providence County, a test must be performed to determine if any communities exceed the maximum entitlement allowable under Rhode Island General Law 45-13-1 (b). This was explained earlier in Step 4 Calculation of $M$ aximum Entitlement.

The following two tables test to see if any of the cities or towns within Providence County exceeds the maximum entitlement. If there are any cities or towns that exceed the maximum entitlement, the excess distribution for these communities must be distributed to the remaining cities and towns proportionately through the same formula used to calculate the first allocation.
A. This column lists the first allocation that was calculated and shown in the previous table.
B. This column lists the Entitlement Limits that were previously calculated in Step 4.
C. This column determines if a community exceeds its maximum allowable entitlement. It takes the entitlement limit and subtracts the first allocation award, column B minus column A. If the difference, column $\mathbf{C}$, results is a negative number then that community has exceeded its maximum entitlement and the difference must be distributed to the remaining communities proportionately through the same formula.

## Providence County

|  |  | A | B | C |
| :--- | :---: | :---: | :---: | :---: |
| Cities | First Allocation | E ntitlement Limits | Difference |  |

| Total | $\mathbf{9 , 3 3 9 , 5 6 1}$ |  | 144,263 |  |

## Recalculate-Distributing Excess Entitlements

Once it is determined that there are communities within the county that exceed the maximum entitlement, the excess must be distributed to those communities that do not exceed the maximum entitlements. The calculation is the same except that the communities that exceed the maximum entitlement are left out of the second calculation, since they are capped at 145 percent of the average per capita statewide amount of the annual appropriation.

The following table redistributes the excess amount, which was the amount that the two cities of Central Falls and Providence exceeded the maximum entitlements. This total is shown in column $\mathbf{E}$ Distribute Excess.

Also note that the Central Falls and Providence total allocations are shown in column $\mathbf{F}$ and it is the entitlement limit calculated from the previous table.

## Cities

A. The tax effort is listed again for this calculation; however, the two cities of Central Falls and Providence are left out of the calculation, due to the fact that these cities will receive the maximum entitlement award shown in the previous table.
B. The per capita income is computed for the cities that do not exceed the maximum entitlement awards.
C. The calculation of R is computed for the cities that do not exceed the maximum entitlement awards.
D. The percentage of $R$ is computed for the cities that do not exceed the maximum entitlement awards.
E. This column distributes the excess entitlements proportionately to the cities and towns that do not exceed the maximum entitlements. The calculation divides the total tax effort for the remaining cities that do not exceed the maximum entitlement by the total tax effort of all the cities and towns in Providence County that do not exceed the maximum entitlement and multiplies it by the percentage of $R$ as calculated in the previous column.
F. This column is the total allocation for each city. It adds the first allocation previously calculated and the amount of the distribution of the excess, shown in column $\mathbf{E}$, to arrive at the total allocation for FY 2009.

## Providence County

| Cities | A Tax Effort | B Per Capita Income Sq. | $\bar{C}$ <br> R | $\overline{\mathrm{D}}$ <br> Percent R | E <br> Distribute Excess |  | F <br> Total <br> Allocation |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| Total | \$ 166,416,824 | \$ 1,005,097,038 | 0.657 | 100.0\% | \$ 2,577,192 | \$ | 29,166,855 |

## Recalculate-Distributing Excess E ntitlements - Towns

Providence County has one town, Johnston that exceeds its maximum allowable entitlement for FY 2009. The excess entitlement must be distributed to the remaining towns in the same manner as the cities' excess was distributed. The following table shows the distribution.
A. The tax effort is listed again for this calculation; however, the town of Johnston is left out of the calculation, due to the fact that it will receive the maximum entitlement award previously calculated and shown in the previous table.
B. The per capita income is computed for the towns that do not exceed the maximum entitlement awards.
C. The calculation of $R$ is computed for the towns that do not exceed the maximum entitlement awards.
D. The percentage of $R$ is computed for the towns that do not exceed the maximum entitlement awards.
E. This column distributes the excess entitlements proportionately to the cities and towns that do not exceed the maximum entitlements. The calculation divides the total tax effort for the remaining towns that do not exceed the maximum entitlement by the total tax effort of all the cities and towns in Providence County that do not exceed the maximum entitlement and multiplies it by the percentage of R as calculated in the previous column.
F. This column is the total allocation for each town. It adds the first allocation previously calculated and the amount of the distribution of the excess, shown in column $\mathbf{E}$, to arrive at the total allocation for FY 2009.

## Providence County

| Towns | ATax Effort |  |  | B Per Capita Income Sq. | $\bar{C}$ <br> R | D Percent R | E Distribute Excess |  | F <br> Total <br> Allocation |

## M aximum Entitlement Allocation

A fter the second allocation is calculated for the cities and towns in Providence County, a test must be performed to determine if any communities exceed the maximum entitlement allowable under Rhode Island General Law 45-13-1 (b). This was explained earlier in Step 4 Calculation of $M$ aximum Entitlement.

The following two tables test to see if any of the cities or towns within Providence County exceeds the maximum entitlement. If there are any cities or towns that exceed the maximum entitlement, the excess distribution for these communities must be distributed to the remaining cities and towns proportionately through the same formula used to calculate the first allocation.
A. This column lists the first allocation that was calculated and shown in the previous table.
B. This column lists the Entitlement Limits that were previously calculated in Step 4.
C. This column determines if a community exceeds its maximum allowable entitlement. It takes the entitlement limit and subtracts the first allocation award, column B minus column A. If the difference, column $\mathbf{C}$, results is a negative number then that community has exceeded its maximum entitlement and the difference must be distributed to the remaining communities proportionately through the same formula.

## Providence County

## Recalculate-Distributing Excess Entitlements

Once it is determined that communities within the county still exceed the maximum entitlement, after the second calculation, the excess must be distributed to those communities that do not exceed the maximum entitlements. The calculation is the same except that the communities that exceed the maximum entitlement are left out of the third calculation, since they are capped at 145 percent of the average per capita statewide amount of the annual appropriation.

The following table redistributes the excess amount, which was the amount that the city of W oonsocket exceeded the maximum entitlement in the second calculation. This total is shown in column $\mathbf{E}$ Distribute Excess.

Also note that the Central Falls and Providence total allocations are shown in column $\mathbf{F}$ and it is the entitlement limit calculated from the previous table.

## Cities

A. The tax effort is listed again for this calculation; however, the cities of W oonsocket Central Falls and Providence are left out of the calculation, due to the fact that these cities will receive the maximum entitlement award shown in the previous table.
B. The per capita income is computed for the cities that do not exceed the maximum entitlement awards.
C. The calculation of $R$ is computed for the cities that do not exceed the maximum entitlement awards.
D. The percentage of $R$ is computed for the cities that do not exceed the maximum entitlement awards.
E. This column distributes the excess entitlements proportionately to the cities and towns that do not exceed the maximum entitlements. The calculation divides the total tax effort for the remaining cities that do not exceed the maximum entitlement by the total tax effort of all the cities and towns in Providence County that do not exceed the maximum entitlement and multiplies it by the percentage of $R$ as calculated in the previous column.
F. This column is the total allocation for each city. It adds the second allocation previously calculated and the amount of the distribution of the excess, shown in column $\mathbf{E}$, to arrive at the total allocation for FY 2009.

## Providence County

## Final Calculation

The final calculation for the General Revenue Sharing program includes the distribution of the dedicated 0.10 percent of all net video lottery terminal income up to a maximum of $\$ 10.0$ million to non-distressed communities based on the proportion of the general revenue sharing distribution for that year.

The following two pages show that calculation for the cities and towns within Providence County.
A. Column A shows the amount based on the calculations for the General Revenue Sharing program.
B. Column B shows the amount of the dedicated state share of the video lottery terminal income that is disbursed proportionately based on the general revenue sharing distribution to all communities that do not qualify for the distressed communities program.
C. Column C summarizes the two amounts, the original FY 2009 enacted payment to each community within the county.
D. Column D illustrates the FY 2009 final payment to each community within the county, which reflects a proportional reduction from the enacted budget.

## W ashington County

The calculation for Washington County is performed in the same manner except that there are no cities within Washington County therefore separate calculations are not required, and only one table is shown on the following page.
A. Tax Effort. The calculation for towns within Washington County begins with the listing of each community's tax effort as reported by the towns and this is shown in column A of the table on the next page. The column lists each individual town's tax effort as reported and it shows the total for the towns' tax effort within W ashington County.
B. Calculate Per Capita Income Squared. Column B of the table on the next page lists each community's cal culated amount for per capita income squared and it totals the per capita income squared for towns within Washington County. This calculation is based on 60.0 percent of the 1990 census data for per capita income and 40.0 percent of the 2000 census data for per capita income, per R hode Island General Law 45-13-1.
C. Calculate "R". Column C calculates the value of $R$, which is defined in Rhode Island General Law 45-13-1 as each town's tax effort, divided by per capita income squared for each town. This amount is shown in column $\mathbf{C}$ of the table on the next page. The result is calculated by dividing column $\mathbf{A}$ by column B, and the column totals the W ashington C ounty value of $R$.
D. Calculate Percentage of "R". Column $\mathbf{C}$ then calculates the percentage of $R$ for each individual town compared to the total $R$ for the towns in W ashington C ounty.
E. Town Allocation. Column $\mathbf{E}$ then calculates the first allocation of the actual award to be made to each town. This is based on the percentage of each town's "R" calculated in D compared to the total " $R$ " for the Washington County, multiplied by the total general revenue sharing appropriation of $\$ 3.8$ million allotted to Washington County that was previously calculated in the five counties allocation. This is the first calculation for each town's award.

## M aximum Entitlement Allocation

A fter the first allocation is calculated for the towns in W ashington County, a test must be performed to determine if any communities exceed the maximum entitlement allowable under Rhode Island General Law 45-13-1 (b). This was explained earlier in Step 4 Calculation of M aximum Entitlement.

The following table tests to see if any of the towns within W ashington County exceeds the maximum entitlement. If there are any towns that exceed the maximum entitlement, the excess distribution for these communities must be distributed to the remaining towns proportionately through the same formula used to calculate the first allocation.
A. This column lists the first allocation that was calculated and shown in the previous table.
B. This column lists the Entitlement Limits that were previously calculated in Step 4.
C. This column determines if a community exceeds its maximum allowable entitlement. It takes the entitlement limit and subtracts the first allocation award, column B minus column A. If the difference, column C, results is a negative number then that community has exceeded its maximum entitlement and the difference must be distributed to the remaining communities through the same formula.

Washington County

| Towns | A <br> First Allocation | B <br> Entitlement Limits | C <br> Difference |  |

## Recalculate-Distributing Excess Entitlements

W ashington County has one town, New Shoreham, that exceeds its maximum allowable entitlement for FY 2009. The excess entitlement must be distributed to the communities that do not exceed the maximum entitlements. The calculation is the same except that the communities that exceed the maximum entitlement are left out of the second calculation, since they are capped at 145 percent of the average per capita statewide amount of the annual appropriation.
A. The tax effort is listed again for this calculation; however, the town of New Shoreham is left out of the calculation, due to the fact that it will receive the maximum entitlement award previously calculated and shown in the previous table.
B. The per capita income is computed for the towns that do not exceed the maximum entitlement awards.
C. The calculation of $R$ is computed for the towns that do not exceed the maximum entitlement awards.
D. The percentage of $R$ is computed for the towns that do not exceed the maximum entitlement awards.
E. This column distributes the excess entitlements proportionately to the towns that do not exceed the maximum entitlements. The calculation divides the total tax effort for the remaining towns that do not exceed the maximum entitlement by the total tax effort of all the towns in Washington County that do not exceed the maximum entitlement and multiplies it by the percentage of $R$ as calculated in the previous column.
F. This column is the total allocation for each town. It adds the first allocation previously calculated and the amount of the distribution of the excess, shown in column E, to arrive at the total allocation for FY 2009.

## Final Calculation

The final calculation for the General Revenue Sharing program includes the distribution of the dedicated 0.10 percent of all net video lottery terminal income up to a maximum of $\$ 10.0$ million to non-distressed communities based on the proportion of the general revenue sharing distribution for that year.

The following page shows that calculation for the towns within W ashington county.
A. Column A shows the amount based on the calculations for the General Revenue Sharing program.
B. Column B shows the amount of the dedicated state share of the video lottery terminal income that is disbursed proportionately based on the general revenue sharing distribution to all communities that do not qualify for the distressed communities program.
C. Column C summarizes the two amounts; the original FY 2009 enacted payment to each community within the county.
D. Column D illustrates the FY 2009 final payment to each community within the county, which reflects a proportional reduction from the enacted budget.

## W ashington County

## Newport C ounty

The general revenue sharing calculation for Newport County is divided into two calculations, one for the city of Newport and one for the five towns within the county.

Due to the fact that there is only one city in Newport County, the City of Newport receives its award based on the city's percentage of tax effort compared to the county's total tax effort multiplied by the general revenue sharing appropriation of $\$ 3.7$ million allotted to Newport County that was previously calculated in the five counties allocation. This is shown in the table on the next page.
A. Tax Effort. The calculation for towns within Newport County begins with the listing of each community's tax effort as reported by the towns and this is shown in column A of the table on the next page. The column lists each individual town's tax effort as reported and it shows the total for the towns' tax effort within Newport County.
B. Calculate Per Capita Income Squared. Column B of the table on the next page lists each community's calculated amount for per capita income squared and it totals the per capita income squared for towns within Newport County. This calculation is based on 60.0 percent of the 1990 census data for per capita income and 40.0 percent of the 2000 census data for per capita income, per Rhode Island General Law 45-13-1.
C. Calculate "R". Column C calculates the value of $R$, which is defined in Rhode Island General Law 45-13-1 as each town's tax effort, divided by per capita income squared for each town. This amount is shown in column $\mathbf{C}$ of the table on the next page. The result is calculated by dividing column $\mathbf{A}$ by column $\mathbf{B}$, and the column totals the Newport County value of R.
D. Calculate Percentage of "R". Column $\mathbf{D}$ then calculates the percentage of R for each individual town compared to the total $R$ for the towns in Newport C ounty.
E. Allocation. Column $\mathbf{E}$ then calculates the first allocation of the actual award to be made to each town. This is based on the total percentage of each town's " $R$ " calculated in D compared to the total "R" for the Newport County, multiplied by the total general revenue sharing appropriation of $\$ 3.7$ million allotted to Newport County that was previously calculated in the five counties allocation less the amount awarded to the City of Newport. This is the first calculation for each town's award.

## Newport C ounty

|  | A | B <br> Per Capita | C | D | E <br> First |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| City | Tax Effort | Income Sq. | R | Percent R | Allocation |  |
| Newport | $\$ 28,772,548$ | $\$$ | - | - | - | $\$$ |

## M aximum Entitlement Allocation

A fter the first allocation is calculated for the communities in Newport County, a test must be performed to determine if any communities exceed the maximum entitlement allowable under Rhode Island General Law 45-13-1 (b). This was explained earlier in Step 4 Calculation of M aximum Entitlement.

The following table tests to see if any of the communities within Newport County exceeds the maximum entitlement. If there are communities that exceed the maximum entitlement, the excess distribution for these communities must be distributed to the remaining communities proportionately through the same formula used to calculate the first allocation.
A. This column lists the first allocation that was calculated and shown in the previous table.
B. This column lists the Entitlement Limits that were previously calculated in Step 4.
C. This column determines if a community exceeds its maximum allowable entitlement. It takes the entitlement limit and subtracts the first allocation award, column B minus column A. If the difference, column $\mathbf{C}$, results is a negative number then that community has exceeded its maximum entitlement and the difference must be distributed to the remaining communities through the same formula.

## Newport County

| City | A |  | B |  | C |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | First Allocation |  | E ntitlement Limits |  | Difference |  |
| N ewport | \$ | 1,542,281 | \$ | 2,003,041 | \$ | 460,761 |

| Total | \$ | 2,115,221 |  |  |  |  |

## Recalculate-Distributing Excess Entitlements

Newport County did not have any communities that exceeded their maximum allowable entitlement for FY 2009. Therefore no recalculation is required to distribute any excess entitlement funds in this county. Note that column $\mathbf{E}$ Distribute Excess in the following table does not have any amounts shown in it. The first allocation previously computed becomes the final allocation for FY 2009 as shown in column $\mathbf{F}$ of the following table.

Newport County

| City |  | A Tax Effort |  | $\begin{gathered} \text { B } \\ \text { Per Capita } \\ \text { Income Sq. } \end{gathered}$ | C $R$ | $\bar{D}$ <br> Percent $R$ | EDistributeExcess |  | F <br> Total Allocation |  |

## K ent C ounty C alculation

The general revenue sharing calculation for Kent County is divided into two calculations, one for the city of Warwick and one for the four towns within the county.

Due to the fact that there is only one city in Kent County, the City of Warwick receives its award based on the city's percentage of tax effort compared to the county's total tax effort multiplied by the general revenue sharing appropriation of $\$ 6.5$ million allotted to Kent County that was previously calculated in the five counties allocation. This is shown in the table on the next page.
A. Tax Effort. The calculation for towns within Kent County begins with the listing of each community's tax effort as reported by the towns and this is shown in column $\mathbf{A}$ of the table on the next page. The column lists each individual town's tax effort as reported and it shows the total for the towns' tax effort within K ent County.
B. Calculate Per Capita Income Squared. Column B of the table on the next page lists each community's cal culated amount for per capita income squared and it totals the per capita income squared for towns within Kent County. This calculation is based on 60.0 percent of the 1990 census data for per capita income and 40.0 percent of the 2000 census data for per capita income, per R hode Island General Law 45-13-1.
C. Calculate "R". Column C calculates the value of $R$, which is defined in Rhode Island General Law 45-13-1 as each town's tax effort, divided by per capita income squared for each town. This amount is shown in column $\mathbf{C}$ of the table on the next page. The result is calculated by dividing column $\mathbf{A}$ by column $\mathbf{B}$, and the column totals the K ent County value of $R$.
D. Calculate Percentage of "R". Column D then calculates the percentage of $R$ for each individual town compared to the total $R$ for the towns in K ent County.
E. Allocation. Column $\mathbf{E}$ then calculates the first allocation of the actual award to be made to each town. This is based on the percentage of each town's " $R$ " calculated in $\mathbf{D}$ compared to the total " $R$ " for the K ent County, multiplied by the total general revenue sharing appropriation of $\$ 6.5$ million allotted to Kent County that was previously calculated in the five counties allocation, less the amount awarded to the City of Warwick. This is the first calculation for each town's award.

## K ent C ounty

| City | A Tax Effort | B Per Capita Income Sq. | C | D Percent R | E <br> First <br> Allocation |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Warwick | \$ 65,802,840 | \$ - |  |  | \$ | 4,069,649 |
| Total | \$ 65,802,840 | \$ - | - | - | \$ | 4,069,649 |

## M aximum Entitlement Allocation

A fter the first allocation is calculated for the communities in K ent County, a test must be performed to determine if any communities exceed the maximum entitlement allowable under Rhode Island General Law 45-13-1 (b). This was explained earlier in Step 4 Calculation of M aximum Entitlement.

The following table tests to see if any of the communities within K ent County exceeds the maximum entitlement. If there are communities that exceed the maximum entitlement, the excess distribution for these communities must be distributed to the remaining communities proportionately through the same formula used to calculate the first allocation.
A. This column lists the first allocation that was calculated and shown in the previous table.
B. This column lists the Entitlement Limits that were previously calculated in Step 4.
C. This column determines if a community exceeds its maximum allowable entitlement. It takes the entitlement limit and subtracts the first allocation award, column B minus column A. If the difference, column $\mathbf{C}$, results is a negative number then that community has exceeded its maximum entitlement and the difference must be distributed to the remaining communities through the same formula.

## K ent County

| City | A |  | B |  | C |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  | First Allocation |  | Entitlement Limits |  | Difference |  |

| Total | \$ | 2,427,386 |  |  |  |  |

## Recalculate-Distributing Excess Entitlements

Kent County did not have any communities that exceeded their maximum allowable entitlement for FY 2009. Therefore no recalculation is required to distribute any excess entitlement funds in this county. Note that column $\mathbf{E}$ Distribute Excess in the following table does not have any amounts shown in it. The first allocation previously computed becomes the final allocation for FY 2009 as shown in column $\mathbf{F}$ of the following table.

## Kent C ounty

$\left.\begin{array}{lccccccc}\hline & \text { A } & \begin{array}{c}\text { B } \\ \text { Per Capita }\end{array} & \text { C } & \text { D } & \begin{array}{c}\text { E } \\ \text { Income Sq. }\end{array} & \text { R } & \text { Percent R }\end{array} \begin{array}{c}\text { Distribute } \\ \text { Excess }\end{array} \quad \begin{array}{c}\text { F } \\ \text { Total } \\ \text { Allocation }\end{array}\right]$

## Final Calculation

The final calculation for the General Revenue Sharing program includes the distribution of the dedicated 0.10 percent of all net video lottery terminal income up to a maximum of $\$ 10.0$ million to non-distressed communities based on the proportion of the general revenue sharing distribution for that year.

The following page shows that calculation for the cities and towns within K ent county.
A. Column A shows the amount based on the calculations for the General Revenue Sharing program.
B. Column B shows the amount of the dedicated state share of the video lottery terminal income that is disbursed proportionately based on the general revenue sharing distribution to all communities that do not qualify for the distressed communities program.
C. Column C summarizes the two amounts; the original FY 2009 enacted payment to each community within the county.
D. Column D illustrates the FY 2009 final payment to each community within the county, which reflects a proportional reduction from the enacted budget.

## K ent County

## Bristol County Calculation

The general revenue sharing calculation for Bristol County has one calculation for the three towns within the county. There are no cities in Bristol County; therefore, only one calculation is required.
A. Tax Effort. The calculation for towns within Bristol County begins with the listing of each community's tax effort as reported by the towns and this is shown in column $\mathbf{A}$ of the table on the next page. The column lists each individual town's tax effort as reported and it shows the total for the towns; tax effort within Bristol County.
B. Calculate Per Capita Income Squared. Column B of the table on the next page lists each community's calculated amount for per capita income squared and it totals the per capita income squared for towns within Bristol County. This calculation is based on 60.0 percent of the 1990 census data for per capita income and 40.0 percent of the 2000 census data for per capita income, per Rhode Island General Law 45-13-1.
C. Calculate "R". Column C calculates the value of $R$, which is defined in Rhode Island General Law 45-13-1 as each town's tax effort, divided by per capita income squared for each town. This amount is shown in column $\mathbf{C}$ of the table on the next page. The result is calculated by dividing column $\mathbf{A}$ by column $\mathbf{B}$, and the column totals the Bristol County value of R.
D. Calculate Percentage of "R". Column $\mathbf{D}$ then calculates the percentage of $R$ for each individual town compared to the total R for the towns in Bristol County.
E. Allocation. Column $\mathbf{E}$ then calculates the first allocation of the actual award to be made to each town. This is based on the percentage of each town's " $R$ " calculated in $\mathbf{D}$ compared to the total "R" for the Bristol County, multiplied by the total general revenue sharing appropriation of $\$ 1.5$ million allotted to Bristol County that was previously calculated in the five counties allocation. This is the first calculation for each town's award.

## Bristol County

| Towns |  | A ax Effort | B <br> Per Capita <br> Income Sq. | R | Percent R |  | E First location |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

| W arren |  | 7,084,397 |  | 328,769, 424 | 0.022 | 28.9\% | - |  | 419,381 |
| Total | \$ | 28,481,563 | \$ | 1,480,735,069 | 0.075 | 100.0\% | - | \$ | 1,450,951 |

## Final Calculation

The final calculation for the General Revenue Sharing program includes the distribution of the dedicated 0.10 percent of all net video lottery terminal income up to a maximum of $\$ 10.0$ million to non-distressed communities based on the proportion of the general revenue sharing distribution for that year.

The following page shows that calculation for the cities and towns within Bristol county.
A. Column A shows the amount based on the calculations for the General Revenue Sharing program.
B. Column B shows the amount of the dedicated state share of the video lottery terminal income that is disbursed proportionately based on the general revenue sharing distribution to all communities that do not qualify for the distressed communities program.
C. Column C summarizes the two amounts; the original FY 2009 enacted payment to each community within the county.
D. Column D illustrates the FY 2009 final payment to each community within the county, which reflects a proportional reduction from the enacted budget.

# Appendix IX 

Library Aid Calculation Data
FY 2012

## State Library Aid

Section 29-6-2 of the Rhode Island General Laws requires that the state share of support to public libraries be 25.0 percent of the amount appropriated and expended in the second preceding fiscal year by each city and town from local tax revenues. It allows for a ratable reduction to the appropriation. The calculations for FY 2012 aid are described below and shown in the table on the following page. The bold italicized letters at the top of the columns in the tables correspond to the calculation steps described below.
A. Calculate Total for Distribution. The Office of Library and Information Services determines the total library aid payment for FY 2012 based on the second preceding fiscal year total local expenditures. That data, for FY 2010, totaled $\$ 30,950,725$ shown in column $\mathbf{A}$ of the table on the next page.
B. Calculate FY 2012 Distributions. The Office calculates what each community would be eligible to receive for FY 2012 based on 25.0 percent of its FY 2009 expenditures as shown in column $\mathbf{A}$. It should be noted that any hold harmless concept was phased in over a three year period that ended in FY 2006. Effective FY 2007, no C communities are held harmless.
C. Endowment Funding. Section 29-6-2 of the General Laws provided for the grant to all libraries to include endowment funding in the second preceding year up to a maximum of 6.0 percent of the three-year average market value of the endowment, calculated at the end of the calendar year. For FY 2012, this is $\$ 849,863$ and shown in column $\mathbf{C}$.

Although it is not shown in the table, it should be noted that the City of Providence receives $\$ 1.0$ for the Statewide Reference Library Resource Grant, designed to allow the library to develop its reference collection, provide email reference service on the state website and provide research expertise in specialized areas such as patents and private foundation funding. Funding allows the entire state to benefit from this service.
D. Ratable Reduction. The 2011 A ssembly provided $\$ 8.8$ million for FY 2012 library operating aid. This is $\$ 0.9$ million less than the 25.0 percent reimbursement. Community distributions are 89.7 percent of the full entitlement to reflect a ratable reduction to the appropriation.
E. FY 2012 Library Aid. Column E contains the total award for each community for FY 2012.
